LOC-LINE®

Modular Coolant Hose & Components
1/2" & 3/4" ID System
Designed to Mate with LOC-LINE®
Hoses & Accessories Only

- Loc-LINE® will stay in position without any spring back
- Since LOC-LINE® has a ball and socket design, bending doesn't decrease the inside diameter and won't kink like copper tubing. Also, there is no internal positioning rod that can break or restrict fluid flow
- Loc-LINE® is electrically non-conductive. It's ideal for use as an EDM flushing hose
- Loc-LINE® is designed for low pressure applications. The following maximum flow rates are recommended to avoid hose jetting
  1/2" LOC-LINE® – 478 gallons/hour
  3/4" LOC-LINE® – 1,140 gallons/hour

1/2" ID System:
Hose Kit includes hose (approx. 13") with 3/8, 1/2" NPT connectors, 1/4, 1/2, 3/8" nozzles
3/4" ID System:
Hose Kit includes hose (approx. 14") with 3/4 NPT connector, 3/4 and 5/8" nozzles

LOC-LINE Extended Elements & Clamps

Clamps Tighten over Socket to Reduce Mobility of Joints

Extended elements and clamps can be used together to run longer lengths of Loc-Line and resist dynamic motion at higher pressures

- Extended elements 3-1/2" Long
- Ball and sockets are interchangeable with standard Loc-Line parts
- Clamps tighten with Torx T-15 screwdriver

CEDARBERG Magna-Flow

Efficient Air/Liquid Flow Control that Delivers Air/Liquid Where it's Needed

Features:

- Two models available
- Fully assembled with 9″ hose lengths and 1/8″ nozzles
- Magnetic base (38 lb/pull) holds unit firmly in position
- Flow control valve allows convenient air/coolant adjustment near work
- Barbed connection easily adapts to regulated shop air or machine coolant pump
- Made of high quality non-corrosive materials

Benefits:

- Eliminates awkward hose support and adjustment
- Quick set-up, tear-down, and transfer to other machines
- Flexible hose can be easily directed
- Delivers air/coolant to those hard-to-reach places
- Extends tool life with precise coolant delivery
- Clears chips from work place for easier visual inspection
- Stays in position

Kool Mist Mist or Flood Coolants

- Safe for your people
- Safe for your materials
- Safe for the environment
- Safe for your machines
- **Formula 78:** For light duty. Is a chemical base mist coolant that dissolves in water to a clear solution. Can be used on any metal or alloy.
- **Formula 77:** For tougher service. Is highly recommended for mist cooling any metal or alloy where tougher machining condition requires greater lubricity.

UNIST Coolube® Lubricants

Coolube® 2210:

- USDA Certified Biobased Product
- Cutting fluid improves performance and increases life of cutting tools, taps, and saw blades
- Machining oil is good for metals, wood, rubber, and most plastics
- Especially effective on aluminum and other non-ferrous metals
- Great for wearpoint lubrication
- Extreme temperature environments (-20°F to 400°F)

Coolube® 2210AL:

- Provides specific benefits when machining aluminum
- Derived from natural vegetable oils, environmentally friendly and there are no VOC's
- Mild odor
- Clear appearance
- Insoluble water solubility
- >199°F (93°C) flash point

Coolube® 2210EP:

- Special formulation ideal for ferrous metals
- Works with all non-ferrous metals except copper
- Does not contain any ingredients currently recognized as hazardous by OSHA, IARC or NIP
- Formulated from cosmetic grade raw materials and is entirely worker and environmentally safe
- Improves performance and increases life of cutting tools, taps and saw blades
- Extreme temperature environments (-20°F to 400°F)

TRICO MD-1200 Micro-Drop® Dispensers

Features:

- Offers higher material removal rates, improved part finish, longer tool life and tighter dimensional tolerances
- Positive pressure design gives instant fluid delivery
- Nozzle design eliminates fogging for greater chip clearing, faster feeds & speeds
- Independent line adjustment allows for two operations at the same time
- Individual, high resolution, air and liquid controls offer flexibility
- Solenoid versions offer interface capability for CNC and other automated applications
- Relative liquid scale allows repeatable setups and saves time in adjusting flow rate

MQL Applicators

Minimum Quantity Lubrication(MQL) Systems for near dry machining. Systems use a precision positive displacement pump to apply minute amounts of vegetable/organic-based lubricants directly to the cutting tool or saw blade edge. Eliminate mist or fog from common spray mist systems while providing the best possible tool life. All applicators should use Unist Coolube lubricants only.

Starrett® All Purpose Lubricant

MADE IN THE USA

- **Penetrates —** Deep-down penetration works quickly to free frozen nuts, bolts and metal parts
- **Lubricates —** This product is free of any silicone, making it an excellent year-round lubricant
- **Prevents rust —** Protects metal against rust and corrosion damage by providing a molecular shield that locks to the metal
- **Cleans —** Removes grease and grime from metal parts.
- **Displaces moisture —** M1 is "wetter than water"; is not soluble in water so it can get under moisture to lift it away from the surface to be protected
- **Non-conductive —** Prevents short circuits in high moisture environments, halts electrical leakage from wet ignition wires

WD-40

Will Not Harm Paint, Plastics, Rubber or Fabrics. Does Not Contain Silicones or Chlorofluorocarbons

MADE IN THE USA

Lubricates—WD-40 will not oxidize and cause delicate mechanisms to gum as will normal lubricants. **Penetrates**—WD-40 is used to free binding and corrosion frozen parts.
Displaces moisture —WD-40 displaces moisture and has a "drying out" effect.
Prevents rust/corrosion —WD-40 stops rust and corrosion. It deposits its inhibitors within the metal. Light rust and corrosion can be wiped off within minutes after application

Mobil Vactra Numbered Series 2 & 4 Way Oil

- Helps eliminate chatter and stick-slip of slides and ways
- Improves finish and quality of parts
- Helps reduce wear and keeps sliding surfaces smooth, lubricated and clean
- Mobil Vactra Oil No. 2 is recommended for horizontal slideways on small to medium size machine tools. It is also suitable for flood application in large machines
- Mobil Vactra Oil No. 4 is the normal recommendation for large machines where way pressures are high or good precision is required. It is also recommended for vertical and inclined slideways where drain-down cohesion can be a problem

LOCTITE® Threadlockers

- Prevents loosening from shock and vibration
- Seals threads
- Stops rust and corrosion
- **222™** Low strength, for small fasteners and components requiring occasional adjustments.
- **242™** Medium strength, for fasteners 1/4" to 3/4". Has controlled lubricity for accurate clamp loads. parts can be removed using a hand tool.
- **243™** Medium strength that is primerless, no need to pre-clean or prime before use. 1/4" thru 3/4"
- **248™** Medium strength same as 242™ but comes in Stick form.
- **262™** Med to high strength a permanent applied threadlocker for fasteners up to 3/4". Excellent where fasteners are exposed to chemicals. Heat and hand tool needed to separate parts.
- **263™** High strength that is primerless, no need to pre-clean or prime most fasteners before use. For fasteners up to 1"
- **277™** High strength for permanent locking and sealing of fasteners.
- **290™** High strength a low viscosity threadlocker for pre-assembled bolts up to 1/2" to secure them in place. Penetrates threads by capillary action. Seals welds and porous metal parts.
- **640™** High strength to secure slip and press fit assemblies.
- **680™** High viscosity retaining compound for joining fitted cylindrical pa rts.
- **2760™** High strength fast cure threadlocker that sets up quick, eliminating the need for primers; develops usual strength within 1 hour. Used for heavy-duty projects.

LOCTITE® Retaining Compound

- Increases the shear strength of cylindrical non-threaded assemblies.
- An industry standard for assembling press and slip-fitted parts.
- **609™** Press fit general purpose compound that is designed to bond gap distance Up to .005”
- **660™** Quick Metal® retaining creamy non-running gel that is used onto cylindrical parts to fill surface imperfections and repair worn areas
- **668™** QuickStix® high temperature compound in a semisolid formula. No mess application, ideal for gaps up to .005”. Withstands temperatures up to 400°F.

The World's Finest Cold Weld Compound

- J-B Weld contains a specific mixture of fine steel in a liquid base
- Super strength chemical used for a carrier and activator that causes the super hard finish after the curing process
- J-B Weld etches other materials that helps the metalizing process to bond tighter and adhere forever
- This etching allows J-B Weld to co-mingle with other materials causing a near perfect weld
- Many machine shops use J-B Weld for repairing cracked motor blocks and other castings, because of its tougher qualities and it will not shrink and is not affected by gasoline, oil, water and most other chemicals
- Now available in shop size

T-BAK™ Tie-Back Personal Fall Limiter

- 7.5' (2.3m) Working capacity
- User-Rated to 400-lbs. (181kg) capacity
- Cost-effective alternative to tie-back shock-absorbing lanyards
- All-in-one, self-retracting lifeline/anchorage connector design reduces equipment required on the job site
- Designed for anchoring below a user's harness back D-ring for greater safety
- Integrated shock absorber especially designed for tie-back applications with load indicator device
- Meets all applicable OSHA, ANSI, CSA and CE standards, including the ANSI Z359.1 requirement that states only 24-inches (.62m) or less of lifeline extends out of the housing when the unit is fully retracted
- The new patented pending Miller Twin Turbo™ D-Ring Connector easily adapts two Miller Turbo T-BAK PFLs for continuous 100% tie-off fall protection

Honeywell MILLER

TwinTurbo™ Fall Protection System

- Patented pending Twin Turbo D-Ring Connector easily adapts two (2) lightweight Miller TurboLite Personal Fall Limiters (PFLs) for continuous 100% tie-off fall protection
- Replacement for double-legged shock-absorbing lanyards
- Innovative design that easily connects to the back D-ring of many fall protection harnesses with non-coated metallic back D-rings increases worker productivity and versatility with freedom of movement – less restrictive than other units on the market
- Permits TurboLite PFLs to swivel in multiple directions for greater mobility; the swivel action prevents webbing from twisting and binding inside of the unit
- Webbing payout smoothly extends/retracts without interruption
- Easy-to-use and assemble/disassemble
- Adapts to most Miller TurboLite PFL models

Cut-Resistant Rating Standards (prior 2016)

Buying and wearing the correct glove is the most critical factor in proper hand protection. It's even more important to understand cut resistant gloves and the features they hold. Cut-resistant gloves come in various fabrics offering different level of cut resistance. It's important to consider the requirements of a particular work environment when choosing a glove material. The ASTM ANSI standard measures the amount of pressure one can apply to a razor blade while moving the blade across a fabric without cutting through the fabric for at least 0.8 inch. Not all gloves are tested and have ratings as of this print. We have indicated over the next few glove pages those gloves that have been tested and have a ratings; they have a rating symbol such as this ANSI 5. For the exact definition of the ASTM standards for gloves please research ASTM F 1790 '05, ASTM F 1790 '97 and ISO 13997. If you're not sure of what type of glove you need for an application, please contact our customer service department for assistance to assure you purchase gloves that will best protect you in the environment you're working in.

ANSI 5 Extreme cut exposure: heavy metal stamping, plate glass handling, meat and poultry, some pulp and paper applications

ANSI 4 High cut exposure: metal stamping, sheet metal handling, glass handling, food service

ANSI 3 Moderate cut exposure: light metal stamping, light-duty glass handling applications

ANSI 2 Low cut exposure: construction, automotive assembly, packaging, some masonry applications

ANSI 1 Nuisance cut exposure: paper cuts, automotive maintenance, parts assembly, material handling

These recommendations are of a general nature and are not specific to everyone's needs. Always ensure your selected glove complies with the mandated safety standard recommended for your application.

Updated ANSI/ISEA cut rating standards* (as of 3/2016)

ANSI/ISEA cut resistance standards are based on a more specific range of testing system; ASTM F2992-15, only implemented on one type of machine the TDM 100. Testing samples are cut along a straight path using a straight-edged blade under applied force. The European ISO 13997 test method will also only use the TDM 100; known as the EN388 standard. This new F2992 standard utilizes a measured cut ranking from ANSI A1 thru ANSI A9 (ANSI/ISEA 2016) which utilizes almost twice the scale measurements from the **1-5** (ISEA 105-2011) scale ranking which has been used since 2011. The European EN 388 guidelines will continue to use newtons.

*This is a shorten construed version of cut rating standards, please contact your glove supplier for an exacting definition of the above-mentioned standards prior to choosing gloves for your application; this to assure the best safety environment for your working application, and for the unabridged description of glove cut ratings standards.

breg Pillow and Snake Style Absorbents

Sponge Suck it up! Styles:

- **Basic Products:** Features a tough, needle-punched polypropylene skin for immediate wicking action. The casing is engineered to continually draw fluid to the center to maximize absorption. Filled with recycled, pre-consumer cellulose. Eco-friendly, economical and highly absorbent. Cellulose filler can absorb twice as much fluid than polypropylene. Absorbs water, oils, inks and other non-aggressive fluids.
- **Hazmat Products:** Features recycled, 100% polypropylene fill which has been treated with surfactant to ensure it will not react to corrosive fluids. Flexible spunbond polypropylene cover provides a larger surface area for faster wicking action. The skin and filler combination is extremely durable. Pillows and sock feature hand-sewn loops that make them easy to retrieve. Absorbs both aggressive and non-aggressive fluids.
- **Oil-Only Products:** Features tough, durable absorbents that repel water and float indefinitely even when fully saturated. Absorbs hydrocarbons, petroleum's and other oil-based fluids while repelling water based fluids. Durable spunbond skins are filled with recycled polypropylene for maximum absorbency. Will not rot or mildew. Pillows and sock feature hand-sewn loops that make them easy to retrieve.

Sponge Pillows Features:

- Sewn seams for increased durability
- Divided into three sections to maintain even distrbution of the filler
- Unique channel design aids in retention of absorbed fluids

Sponge Snakes Features:

- Sewn seams for increased durability
- Firm, yet pliable can be easily molded to fit around machinery
- Fluid is drawn into the center of snake for maximum absorption and retention

ACCUFORM.

Accident Prevention Signs

Sign standards, OSHA 29 CFR§ 1910.145 and ANSI Z535, provide guidance for specifications, design and application of accident prevention signs. Signs indicate potential, type, and degree of hazards that may lead to accidental injury or property damage and convey a rapidly understood message on how to avoid hazards.

- **Adhesive Vinyl (V):** Flexible 4-mil thick vinyl with permanent acrylic adhesive back. Moisture resistant with scored backing for easy peel-off and apply. Ideal for light duty use.
- **Plastic (P):** Moderate-duty .055" thick plastic ideal for indoors and sheltered outdoor environments. Impact resistant with 3/16" corner mounting holes.
- **Aluminum (A):** Rigid .040" aluminum printed and protected with UV overlaminate. Durable for indoor and outdoor harsh environments. 3/16" corner mounting holes.

Stem casters are available on the 050 and 200 series casters. Casters with brakes are available on all of the above casters.

Wheel Types and Applications:

H = Hard Rubber
Molded of a special hard fibrous rubber compound. High capacities. Good floor protection. Oil and chemical resistant. Recommended for concrete, wood block, and steel floor surfaces.

M = Phenolic
Molded of a phenolic resin compound backed with macerated or chopped canvas. Resists shock without chipping. Non-marking. Non-sparking. Can be operated continuously -50° to 260°, intermittently to 300°F. Unaffected by grease, oil or most other chemicals. Excellent for floor protection. Recommended for concrete and ceramic tile. Not recommended for softer tile.

S = Semi-Steel
Constructed of top grade cast iron, with steel added for extra strength. High capacities. Recommended for extreme heat and cold, around chemicals, wood block and steel floors. Not suggested for concrete, as floor protection is minimal.

V = Mold-On Rubber
Charcoal gray rubber. Will not mark like black rubber. Easier rolling. Lightweight, yet is designed to withstand shock loads. Recommended for hand trucks or load wheels. May be used in any application in which floor protection is the prime consideration. Exception: Around animal fats and blood, a chemical reaction could cause bond separation.

L = Polyurethane Mold-On
Polyurethane elastomer treads bonded to cast iron centers. High capacities of steel with the non-marking qualities of rubber wheels. Complete floor protection. Outwears rubber five-to-one. Resistant to most oils and chemicals. Recommended for virtually all floor surfaces. Exception: Around animal fats and blood, a chemical reaction could cause bond separation.

X = Cushion Tread
Molded with a cushion outer tread and a hard fibrous innner core. Non-marking, noiseless. Affords complete floor protection. Recommended for hardwood, linoleum, ceramict tile, concrete or smooth steel floors.

T = Red Polyurethane
A bright red polyurethane bonded around and through a tough polyolefin core. For use on virtually any floor surface under almost all operationg conditions. High capacities. Lightweight, but resistant to impact, shock and abrasion.

P = Mold-On Rubber
Vulcanized mold-on rubber. Standard with steel centers. A soft rubber tread protects the floor and affords quiet operations.

R = Gray Polyurethane
Gray polyurethane tread, mechanically bonded to a durable polyolefin core. For lighter loads. Ideal for wet conditions. Non-marking. Complete floor protection.

Heavy Duty UltraCap Industrial Shelving

- Easy to assemble shelving is perfect when configuring runs of multiple shelving sections
- Select a Starter unit and then use as many Add-On units as needed to complete a section - Each Add-On unit connects easily to adjacent shelving using a common 14-gauge box shaped post that creates a very strong unified structure
- No disassembly required
- Gray powder coat finish provides added protection from rust and chipping. Optional Steel Panel Kits available to enclose back and sides of open units
- All units are 85" high
- 20-gauge shelves with tubular welded box beam construction have lapped and welded corners to provide maximum strength
- 14-gauge common box formed front posts provide full shelf access and reduce assembly time when connecting two or more units
- Posts are punched on 1" centers for easy shelf adjustment

Adjustable, heavy duty steel shelf clips install easily, no special tools needed.

edsal Heavy Duty Industrial Work Benches

- **Butcher Block Maple:** Made from quality kiln-dried maple strips. Solid laminated maple top resists damage by sharp tools and solid blows, yet harmless to precision machined parts and dies. Recommendable for tool and die work, electrical wiring, fabric cutting, industrial arts, or office. Maximum shock absorption where sensitive instruments are used. 1-3/4" thick. Stringer not included with this top.
- **Steel Top:** 12 Gauge steel top is the number one choice for heavy-duty use. Will not become oil soaked or crack. Gray enamel finish. 1-3/4" thick.
- **ShopTop:** The preferred work surface for industry. Features a hard, gloss smooth surface of phenolic bonded particle board with a core of northern hardwoods; 30% harder than maple. Light color matte finish. Resists acids, oil, and grease. 1-3/4" thick.

Quick Disconnects Vinyl

- Rigid polyvinyl chloride (PVC) insulation for wire range from #22 to #10
- Female is tin plated brass with rolled edge design for maximum spring
- Male is pure copper tab, with zinc chromate for greater corrosion resistance
- UL listed 0 7B07, CSA approved – AP98720 to 90°C (194°F) maximum
- 600V Maximum building wire (1000V max. in fixtures and signs)
- Thomas & Betts package quanity - 75
- Hillsdale Terminal package quantity - 100

Standard Low Head Socket Cap Screws

- Low head socket cap screws are similar to socket cap screws except the head is 50% smaller than a regular socket cap screw
- Excellent in applications where there is limited clearance to accept a socket cap screw
- Pre-loads strengths are less than a standard socket cap screw

Button Head Socket Cap Screws

Coarse Thread

- The button socket cap screw is close in design to a socket cap screw
- The dome shaped head is wider, and has a lower style head than a socket cap screw
- Button socket cap screws are not recommended for critical, high strength applications
- Heat treated alloy steel class 3A thread fit standard

- NC thread series
- Class 3A thread
- Used for rotation or sliding applications such as pulley shafts, in punch work, or for use as a bearing pin
- Shoulder screws are also referred to as “stripper bolts”
- The shoulder screw has an enlarged unthreaded, cylindrical shoulder under the head, the diameter of which serves as basis for the begining of the nominal size

Metric Dowel Pins

- A solid headless straight pin with a closely controlled diameter
- One end is chamfered with the other end radiused to form a crown
- Precise tolerances of dowel pins make them excellent for achieving proper alignment of parts in high-speed assemblies
- DiN 6325
- Heat treated to RC 60 min. — surface
- RC 47-58 - core

MADE IN THE USA Metric Pull Dowels

- Tapped hole for easy pull-out
- Heat treated alloy steel
- Pull dowel pins are easier, more accurate and more economical than modifying standard dowel pins
- Pull dowel pins are easy to install in blind holes, and are reusable
- DiN 7979
- Case hardened RC 58-62

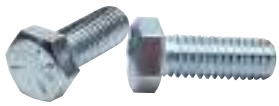
Hex Cap Screws

Hex Cap Grade 5 - Zinc:

- Grade 5 hex head cap screws are heat treated
- Ideal fastener for use in routine fastening applications
- Grade 5 hex cap screws offers the versatility of dual usage in most applications, either as a stronger substitute for a grade 2 application, or its designed purpose as grade 5 hex head cap screw
- Grade 5 hex cap screws are finished with a bright zinc plate

Hex Cap Grade 8 - Zinc/Yellow:



- Grade 8 hex head cap screws are designed for use in areas where there is high stress, and need for extra strength
- Used with grade 8 nuts to give you the reliability and assurance that you need
- The zinc and yellow plating offers a greater degree resistance than standard zinc, and its bright yellow plating will differentiate itself from our grade 5 hex cap screws

Lock Nuts

Stover Lock Nut Grade C Plated

- An all-metal, one-piece hex nut that derives its prevailing torque feature from a controlled distortion of its top threads from their normal circle form to a more oval shape
- The grade C feature gives it a high quality strength consistent with grade 8
- Zinc plated

Nylon Insert (Elastic) Stop Nut

- A Hex nut with a nylon-filled collar on one end
- The locking feature engages when a screw reaches the collar and forms a tight fit
- Excellent for areas exposed to vibration
- Zinc plated

Finished Hex Nuts

Finished Hex Nuts Grade 2
- Low carbon nut used with a grade 2 fastener
- Used in light duty work
- Zinc plating offers a bright finished look with a good corrosion resistance in many environments not exposed to excessive moisture

Finished Hex Nuts - Grade 5
- Medium grade hex nut used with grade 5, or low carbon fastener
- Common usage is medium duty work to fasten items together that has a higher need for strength than grade 2 fasteners
- Plating same as grade 2 hex nut

Finished Hex Nuts Grade 8
- High grade hex nut used with grade 8 fasteners
- This grade is very strong, and is used with bolts that have a minimum tensile strength equal to or less than 150,000 PSI
- The zinc & yellow plating offers a greater degree of corrosion resistance than standard zinc, and its bright yellow plating will differentiate itself from our grade 2 and grade 5 hex nuts

Metric Nuts

Hex Nuts Zinc:
- Conforms to **DIN-934** standards
- Available in material grade 8.8 non-heat treated, and grade 10.9 heat treated
- Metric hex nuts should be used with equivalent grade bolts and screws
- Zinc plated, with a bright finish

Nylon Insert Lock Nuts:
- Conforms to **DIN–985** standards
- Available in class 8, and class 10
- Nylon insert lock nuts have a nylon-filled collar at its back end
- When the screw reaches the collar, the threads and nylon form a tight fit, restricting movement of the screw when it's subjected to vibration
- Available in zinc bright finish

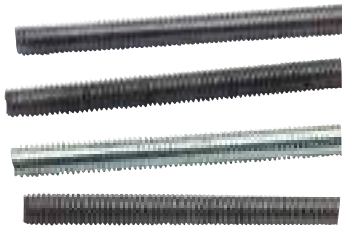
MADE IN THE USA Threaded Rod



Steel-Oil Plain:
- Low carbon AISI C-1010 to C-1020 type steel
- Coarse or Fine thread
- Zinc Plated coated

B7 Alloy Steel:
- Made from alloy steel 4140B-7
- Manufactured with chromium molybdenum for high strength and through hardness

304 Stainless:
- Corrosion resistance (18-8 stainless steel)
- Designed for use in chemical, marine, and other environments where corrosion protection is needed
- Non-magnetic
- **Sold in 3 Foot Lengths**

Wedge Anchors

- Used for heavy duty fastening applications where high pullout values are required
- The advanced design of the collar reduces the likelihood of the anchor "spinning"
- Used in a wide variety of structural applications
- Pipe-hanging tilt-ups, bridges, elevator equipment, conveyors and highway construction frequently require the wedge type anchor
- Ideal for installing machinery, hand rails, dock bumpers and storage racks, etc.
- Wedge anchors are sold unassembled with the appropriate nuts and washers

Sleeve Anchors

- Dependable for use in brick, cinder block, thin wall, marble and concrete
- One benefit is that the base material doesn't have to be solid
- Like the wedge anchor, the sleeve anchors diameter and the hole size are the same, simplifying installation
- The variety of head styles offers extra versatility, and this preassembled anchor is extremely fast and easy to use
- Ability to remove this anchor after installation
- Used for anchoring window and door frames, thresholds, cabinets, theater seats, duct straps, dock bumpers, aluminum and steel angles, steel columns, etc.

MADE IN THE USA Drill Rods

- (A-2) Air-hardening ground and polished drill rod
- (S-7) Shock Resistant Tool Steel Super-7
- (O-1) A non-shrinking general purpose tool steel
- (W-1) Water hardened drill rod is the most popular, versatile, and least expensive grade of drill rod
- High carbon contents allows it to be used often without heat treatment, for maintenance applications
- Oil hardened drill rod, has excellent abrasion resistance, toughness and machinability characteristics
- 3 Feet lengths

Woodruff Keys

- Used to lock pulleys and gears tightly to transmission shafts
- Keys reach deep into key shaft and become firmly embedded, but also rock in their seat and adjust to an angular spine

How to use the PRECISION BRAND Sets:

- Punch the I.D. hole first
- Attach the appropriate I.D. pilot to the O.D. punch
- Insert the O.D. punch so that the I.D. pilot moves into the I.D. hole which should automatically center the material. Make sure the O.D. punch has been pushed completely through the top plate and is touching the material
- Strike the punch squarely with enough force to penetrate the material with one blow

PRECISION BRAND Punch & Die Set

- Traditional style punch & die set
- Economical way to make washers, shims and gaskets
- Cut steel, brass, copper, aluminum, rubber and plastic up to .025" thick
- Cut stainless and blue tempered shim up to .010" thick
- Packaged in durable plastic case
- The base and punches are made of a hardened and ground A-2 tool steel
- Clear plastic top plate is marked with accurate center lines
- Mark center lines, align with center lines and hit with hammer
- Nine punch sizes: 1/8, 3/16, 1/4, 5/16, 3/8, 7/16, 1/2, 5/8 and 3/4"

PRECISION BRAND Punch & Die Stand

- Provides solid support for consistent shim and washer fabricating
- Custom fit, sturdy steel die stand holds dies from any of the sets: 40105, 40110, 40200 & 40300
- Stand allows for easy access to cut shims and washers
- Elevated die allows punches to fall clean, reduces shim burrs and decreases possible damage to punches
- The last hammer hit to push the punch completely through the die is eliminated, thus reducing risk of injury to the hand holding the die during this process

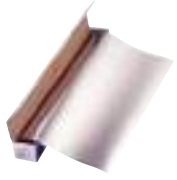
PRECISION BRAND Tool Wraps



- Made of soft annealed, stainless steel
- Helps protect from scale and oxide buildup during heat treating in atmospheric furnaces
- Resistant to chromium carbide precipitation during exposure to high temperatures
- Eliminates decarburization buildup
- Protects the surface of air hardening tool steels
- Cut-to-fit stainless steel tool wrap creates an airtight envelope around your part
- Type 321 can be used in furnaces up to 2000˚F (1093˚C)
- Type 309 can be used in furnaces up to 2240°F (1227°C)
- You realize the benefits of a vacuum furnace at a fraction of the cost
- Thickness: 0.002"

Low-Carbon 24" Length Ground Flat Stock

- A fine-grained, vacuum-degassed carbon steel
- Easily machined, has excellent weldability and responds uniformly to case hardening
- Manganese content provides greater strength and hardness compared to many other carbon steels
- Often used in its natural state for such applications as backup plate, stripper plates, punch pads and machine parts
- Used for jigs, fixtures, cams and patterns
- **Hardening:** CARBURIZING: For maximum depth of hardening, 1/21", hold in carburizing salt at 1700°F for 3 hours. CASE HARDENING: Hold in sodium cyanide salt bath at 1500°F for 30 minutes. Maximum case is .006"

Auto-Adjust Toggle Clamps

- Auto-Adjust Toggle Clamp automatically adjusts to variations in work piece dimensions while maintaining constant clamping force
- Removable non-marring plastic cap is included on the 7/8" diameter pads.
- **Adjustable Clamping Force:** The integrated clamping force adjustment screw can be used to create an actually applied clamping force from 25 to 550 lbs. (max holding capacity 700 lbs.) One BESSEY® Auto-Adjust Toggle Clamp can replace a range of competitive clamps.
- **Adaptable Base Plate:** The large (2 1/4" x 2 1/2") flanged base is designed for use with 1/4" or M6 fasteners. Mounting holes are sized & spaced for easy mounting and versatility.
- **Extra large handle:** The large 1" x 2-1/8" handle offers greater user comfort and ease of operation

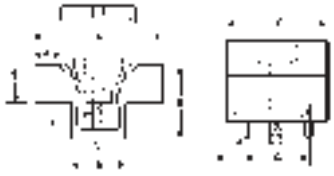
Machinable Uniforce Clamps



- The compact Uniforce® clamp is available with extra material on the clamping jaws so it can be machined to conform to the shape of your workpiece - enabling you to fixture unusual applications easily
- The specially designed steel wedge spreads the clamping force uniformly on both sides of the 7075-T6 aluminum channel
- *A: The distance needed between workpieces for clamp clearance, drill and tap mounting holes on the center of “A” dimension
- †F: The amount of machinable stock on jaws
- **H: Mounting screws included
- NOTE: Locking plate properly expands the clamp, while making it rigid for machining - Machine to a slip fit on workpiece - Remove locking plate before clamping workpiece

ID Xpansion Clamps

- Ideal way to hold parts on an inside diameter for multiple machining on vertical or horizontal machining centers
- Can also be used as an expanding mandrel on a lathe
- Produced in 12L14 steel with black oxide coating
- Can hold interanl diameters from under 3/16 to amlomst 10” (4.0 to 254mm)
- No. 10 manufactured using 7076-T6 aluminum
- Flange diameter of the clamp is held to a close tolerance for precision locating in a machined pocket on work cubes and fixture plates
- Wuickly tightened with a hex key, torque driver or can be mated to hydraulic pull cylinders for automation
- G†- Minimum diameter the “F” dimension be machined or turned down to
- H*-(3) Mounting screws included

Pitbull® Clamps

- Revolutionary Pitbull® clamp remains the lowest profile, highest holding force clampe
- High vertical and horizontal clamping forces are generated, considering the size of the Pitbull® Clamps
- Uses a standard cap screw and an oil resistant O-ring
- Low bite
- Positive down force
- High strength A2 Tool Steel
- D*- Clamp height

Steel Clamps

- Sliding arm moves to position itself right next to your workpiece to support the Acme threaded screw
- By comparison, when a 3" C-clamp is used to do the job of a 1" C-clamp, the point of support for the screw does NOT move… leaving the extended screw to do all the work

MADE IN THE USA

Compact and powerful rare earth permanent lift magnet for use on flat or round surfaces. Contains an internal on/off release device that does not contact or damage the surface of the part. Permanent magnetic lifts eliminate the fear of dropping the load being lifted due to power failures. Use two or more lifts on a spreader bar to prevent sheet flexing, sagging or peel-off. To operate Test Feature, pull spring loaded handle out and rotate it to the "Test" position. Lift load approximately 2-3" to verify the magnet has the capacity to lift your load. Once verified, place load back down and turn the handle to the "ON" position. Never complete entire lift operation in "Test" position.

Magnefix Vise Jaw Caps

Magnetic Protective Jaw Caps

Designed to protect both the vise jaws and the workpiece from marring or deforming during clamping.

- Aluminum alloy with two built-in circular magnets
- Caps are magnetic only towards the vise – clamped parts will not become magnetized
- Right angled and surface parallel to fit any type vise

Model P - Prism Magnefix Jaw Caps

- Jaw construction includes a 120° horizontal Vee-Groove, 3 vertical Vee-Grooves and a 90° groove for marking out and center punching
- Ideal for light tapping

P4

Model R - Rubber Face Magnefix Jaw Caps

- Aluminum alloy with synthetic rubber cover
- Conforms to workpiece and grip without slipping
- Mar-free

R4

Model F- Fiber Face Magneflex Jaw Caps

- Aluminum alloy with laminated fiber cover to prevent the absorption of outside materials
- Heat parts rapidly by concentrating heat into part
- Use on workpieces to avoid distortion and clamping marks

F4

Model A- Aluminum Magneflex Jaw Caps

- Aluminum alloy design includes six grooves to compensate for the unevenness of the workpiece
- Deeper V-groove ensures more secure clamping of circular workpieces
- Use together with rubber magnefix jaw caps

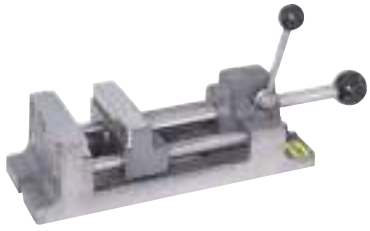
5 Styles to Choose From!

MADE IN THE USA



- Designed for fast loading and unloading
- SV- Standard series locking mechanism, when actuated sets the jaw in place
- PA - Pumping action series is able to advance the jaw forward by “pumping the locking lever”
- GM - Series is similar to the (SV), except it has one side ground perpendicular to the base, which allows for the vise to be rotated 90°, thus eliminating the refixturing of the workpart
- TS - Series is similar to the (SV) except it has two ground sides perpendicular to the base. This allows the base to be rotated ±90°
- PA - Series is ideal for warped castings, wood, or metal laminations and plastics
- Holding power is adjustable from 400 to 1100 lbs. for (SA, GA, TS) series, 200-350 lbs. for (PA)
- Vise base is designed for clear through drilling

Cross Slide Vise

- This unit accurately moves the work in two directions along the X and Y axis
- Ideal for positioning form one machine location to another without losing squareness or alignment
- The cross slide vise gets its strength from the 30,000 PSI tensile strength fine grain cast iron it's made from
- Feed screws are precision cut acme threads
- Built on the cross-slide base
- Dials are graduated in 0.001 in increments
- Counter-balance steel ball crank handles that clear the machine table
- Easily convert from a cross slide vise to a traditional vise by simply removing the screws and the base

ROHM RB-K Vises

- Operated mechanically with power intensification
- Stepwise clamping force presetting
- Clamping without power intensification for deformation-sensitive work-pieces possible
- High precision due to precise jaw guides
- Rapid clamping range adjustment via locking pin
- Better coolant and chip flow
- High wear resistance due to hardenend jaw guides
- Can be used on a rotation plate with angular spacing
- Ground area with longitudinal groove for accurate fixing on machine table
- Clamping option with clamps
- Enclosed spindle

PALMGREN Dual Force Mechanical Booster Vises

- Equipped with a patented mechanical booster and adjustable clamping force system that delivers secure, accurate and efficient clamping without the need to over tighten the vise spindle
- The adjustable clamping pressure provides consistent, continuous force of up to 11,200 pounds (50KN) maximum making part holding simple and easy
- Precise clamping force regulation (patented) is achieved by turning the force ring to one of three graduation settings and a simple turn on the handle provides precise clamping pressure every time
- Adjustable clamping pressure provides consistent, continuous force of up to 11,200 pounds (50KN) maximum making part holding easy
- Mechanical booster (patented) is equipped with an internal disc spring design that guards against shocks and vibrations maintaining consistent pressure during the machining operation
- Incorporates the Dual-Force design of all directional alignment with a 1/2 pound of downward force for every pound of horizontal force
- Precision ground and hardened jaw plates and hardened vise body
- Lifetime Warranty

PALMGREN Dual Force Double Station Vise

- Allows for multiple part workholding for better spindle utilization, reduced tool change time, and reduced machine travel from part to part
- 80,000 PSI ductile iron casting deliver the strength, rigidity and long term accuracy required while absorbing machine vibration
- 1/2 pound of downward force for every pound of horizontal force on both moveable jaws
- Can be mounted horizontally or vertically
- One handle operates the two moveable jaws
- Unit can clamp two of the same size parts or different size parts
- Lifetime Warranty

- Can be used on both vertical as well as horizontal machining centers
- Centering accuracy from minimum to maxiumum opening is .0006” with .0002” repeatablility
- Both moveable jaws incorporate the Dual Force design with zero deflection and lift while providing quick, accurate centering of the workpiece
- Precision ground on all sides
- Equipped with Dual Force anti-lift mechanism in both jaws
- Height tolerance is within ±0.0004” so several vises can be lined up parallel to each other
- 80,000 PSI ductile iron castings deliver the strength, rigidity and long term accuracy required while absorbing machine vibration
- Hardened bed ways

HD690 & HD691 Series Vises

- Stationary jaw bolts down from top
- No need to remove from table to disassemble vise
- Bolting the stationary from the top reduces the stress in the body and will stay flatter after assembly
- Bolts and locates directly on standard grid plates: 40mm, 50mm or 2”
- Pull type body design reduces stress in the body resulting in more accurate clamping
- Quick change movable jaw
- Adaptable to hydraulic (HD690)
- Uses sine keys for alignment
- GrooveLock® jaw and workstop included
- Body Height matched ±0.0005”

HDL Anglock® Vises

Features:

- High density long vises with two clamping stations
- Provide repeatable clamping to 0.0002” and combine high density with heavy duty features
- Designed on rugged 80,000 PSI ductile iron body with steel components, provide strength, rigidity and long term accuracy while absorbing machining vibration
- Full 4” opening in each station with standard jaw system
- Maximizes number of parts in the work envelope
- Adjustable pre-load feature allows you to minimize pre-load range thus reducing the turns of the handle to open or close the vise.
- Holding block features the ability to clamp same or dissimilar sized parts and provides pre-loading ability in the front or back jaw.
- **Hydraulic models also available – please inquire.**

KURT Hydraulic Cluster Towers

- This hydraulically operated eight station tower features all-new design for fast loading of parts
- All internalized hydraulic piston/nut saves valuable space
- Includes all original KURT AngLock precision clamping and iron clad rigid construction for damping vibration

Features:

- Hydraulically operated eight station CTHDHLM64 Cluster Tower
- Utilizes an all internal hydraulic piston nut to conserve space
- Pressure is maintained until released by operator or triggering device
- Easy disconnect for pallet shuttle
- Repeatable clamping to 0.0002”
- Each station delivers up to 7,100 lbs. of clam
- Each face is controlled separately for conver removal
- Jaw opening is 4” per station
- Each face has a maximum total stroke of 1/4
- Jaw options available: Hard jaws, machinabl ductile iron
- Base sizes available: 400mm, 500mm, 630n
- Lifetime Iron Clad Warranty

PALMGREN Dual Force 5 Axis Machine Vises

- Designed especially for multi-face machining of simple to complicated workpieceswith a single clamping operation
- These vises are small but have a large holding capacity making them ideal for 5-sided machining
- Equipped with a variety of jaw options to cover a wide range of workholding applications
- These unique vises deliver unrestricted all around access to the workpiece and are equipped with our Dual Force anti-lift mechanism to counter the lifting effect on the part while being machined
- 80,000 PSI Ductile iron castings for rigidity and dimensional stability
- Simple, robust construction, smooth surfaces, easy cleaning
- All sides are hardened and ground
- Both clamping jaws move simultaneously, self-centering to shorten the clamp and un-clamp times
- From the center of the workpiece to the bed of the vise is perpendicular to 0.0004”
- Lifetime Warranty

Suburban Circular Type Magnetic Chucks

- Ceramic magnets provide three times the holding power of ordinary magnets
- Individually magnetized poles assure uniform pull
- No dead spots
- Full power over entire top surface
- Solid top and bottom plates retain accuracy
- Ideal height for work clearance

Suburban Round Rare Earth Magnetics Chucks

MRRE13

MRRE30FP

Features:
- Made with neodymium iron boron type rare earth magnets for exceptonal holding power
- 80 N/cm2 (116 psi) nominal holding power

Standard Pole:
- Suitable for grinding & light milling
- Works best for holding medium-sized workpieces
- Has 4mm steel poles & 2mm brass spacers

Fine Pole:
- Suitable for grinding & EDM
- Works best for holding smaller & thinner workpieces
- Has 1.5mm steel poles & 0.5mm brass spacers

O.L. Walker Ceramax Magnetic Chucks

MADE IN THE USA

- Industry standard for permanent magnetic chucks
- Fine pole for maximum strength on small or hardened parts
- Double stacked magnets creating the strongest holding power of any ceramic magnetic chuck
- Silver brazed top plate for maximum holding power
- Watertight for grinders, EDM and milling applications
- Lowest height of any permanent chuck
- Includes backrest, side rails, and two cast clamps

O.S. WALKER Electromagnetic Chuck Controls

Manual Release Variable Holding

SCV-1.5 Series Features:

- Direct current supply
- Variable holding feature
- Manual release
- Input: 115V AC
- Output: 0-110V DC
- Wattage capacity: 150
- Can be used with LBP chucks

MADE IN THE USA

SMART-B Series Features:

- Automatic release
- Full, varaible, and residual holding
- Compatible use with chucks from other manufacturers
- Touchpad control for easy selection
- Automatic release cycle assures workpiece is released cleanly without residual magnetism
- Input: 115 VAC Output: 0-110 VDC

Super Chuck® Ball Bearing Chucks

Designed for close tolerance production drilling on precision equipment

- Specifically engineered for heavy-duty, close tolerance production drilling
- Adaptable to a wide range of production drilling equipment, jig borers, milling machines, lathes and radials
- Utilizing a ball thrust bearing to reduce friction in the chuck closing mechanism, it permits the application of more gripping force on drill shanks to maximize drilling torque
- Ball bearing construction maximizes gripping force and drilling accuracy
- Jaws center-ground for absolute straightness and alignment
- Through–hardened sleeve teeth plus hardened nose and keyholes provide outstanding wear resistance
- T.I.R. .003” Maximum at half capacity

GTI ER Tapping Attachments ISO 9002

Application:
- Axial-float/tension/compression type for CNC milling machines and lathes with reversing motors and rigid tapping

Features:
- Compensates for machine feed and tap pitch variance
- Floating mechanism compensates for misalignment between tap and workpiece
- Right and left hand tapping
- Practical and efficient tap holding by the ER spring collet without using jaw drive
- Compact design for minimal clearance applications
- Heavy-duty design for high torque drive ensures the same accuracy as the tap itself

TAPMATIC RX Series Tapping Heads

Self-Reversing Tapping Heads For Drill Presses & Milling Machines

- Pre-selective torque drive prevents tap breakage
- Heavy duty ball clutch
- Accurate depth control
- Re-entry cushion eliminates cross threading
- Higher production rates
- Longer tap life
- For right hand tapping only

High Speed Tappers

Style E & F

- Balanced, heat-treated gear reversing mechanism minimizes strain and wear.
- Reverses at twice forward speed to increase productivity and avoid tap jamming.
- Extremely sensitive friction clutch engages conical surfaces of drive and reverse shells with smooth, "cushioned" action, allowing sensitive operator "feel"
- Assure automatic tap protection
- One-piece TRU-GRIP spindle assures true alignment
- Can be modified to be used in horizontal position
- Factory can easily alter any model for left-hand tapping
- **Collets not included—order separately below**

TRU-GRIP Straight Shank Tapping Chucks

- Use on CNC machining centers, screw machines, automatic lathes and chuckers, CNC lathes and milling machines
- Eliminates tap breakage caused during machine reversal by automatically providing overtravel and compensating for improper feed ranges
- Provides excellent tapped holes
- Can be used in either rigid or reversing spindles
- Easily adapts to any machine with a 3/4”, or 1”, or 1-1/2” holder
- Order style “E”/“F” collets sold separately

Rectangular Multiple Spindle Heads

Prices shown are for the multiple spindle heads only. Other prices will vary depending on your requirements. To determine the correct multiple spindle head for your application, please provide the work area, the size & number of holes and the type of material to be machined. Please also specify the make & model of the drill press to be used. Cover clamps for drilling heads are sold separately according to the style of drill press.

- Spindle assemblies and collets sold separately
- Driling head shown with optional cover clamp

PARLEC Rigid Tapping Holders

- For use with popular Bilz style size and adapters
- Utilizes existing adapter inventory
- Rigid and tension-only shank available for use with sychronous tapping cycles
- Radial float improves thread quality and tap life
- Short projection maximizes workpiece size
- Adjustable short compression stroke ensures accurate depth control
- Free-floating tension stroke ensures thread size and quality
- Rugged alloy steel construction long trouble-free service life
- Coolant through up to 250 lbs. pressure

PARLEC Tap Adapters

- **Rigid:** Best suited for through holes and in applications where tap breakage is not a concern
- **Torque Control:** Torque Control Adapters are the best solution for protecting your taps and work pieces from tap breakage. The prime application for Torque Control Adapters is Blind Hole Tapping and where Chip Evacuation is a concern

Tapping Collets - Inch

Rapidhold:
- 0.0004" T.I.R.
- High Qaulity Spring Steel
- Works with standard ER Collet chucks for synchronous Rigid Tapping Operations
- Replaces Tap Holders
- Tapping clearance is reduced
- Collet design locks tap shank

Rego-Fix:
- Interchangeable, with standard ER collet DIN 6499/ISO 15488
- No additional toolholders and clamping nuts necessary
- Wide product range, sizes: ER11 to 40
- Square for tight grip of tap, eliminates tap slippage in collets

Techniks:
- Reduced clearance requirements
- Special design locks square in slots
- Compatible with the standard collet chucks for ER, DR, RD, ESX, BR or DIN 6499 collet pockets
- The special square design locks flat-sided tap shanks into collet, preventing the tap from spinning inside the collet

Collet Style/Fits - ER11

Tapping Collets - Metric

Rego-Fix:

- Interchangeable, with standard ER collet DIN 6499/ISO 15488
- No additional toolholders and clamping nuts necessary
- Wide product range, sizes: ER11 to 40
- Square for tight grip of tap, eliminates tap slippage in collets

Techniks:

- Reduced clearance requirements
- Special design locks square in slots
- Compatible with the stanard collet chucks for ER, DR, RDd, ESX, BR or DIN 6499 collet pockets
- The special square design locks flat-sided tap shanks into collet, preventing the tap from spinning inside the collet

Criterion Model CB Round Styles

- Because of the two vertical and one horizontal hole, the merit of these heads lies in their versatility
- They feature a wide bar holder base to assure maximum rigidity
- As in all Criterion heads, they too feature direct dial screws
- The threaded shanks accept a variety of shanks
- Note: Other diameters and hole size options exist-call for price and availability

Criterion 3FHB Boring and Facing Head

- Ideal tool for performing those difficult facing, grooving, backfacing and counterboring operations on work pieces too large to turn or too bulky to handle safely
- Automatic feed is in the forward mode and is actuated by holding a knurled feed-ring
- To return to starting position a hex wrench is inserted in the end of the micrometer screw and manually reversed
- Features a gear drive that generates a continuous feed rate of .003” per revolution
- To prevent damage to the gear train, a specially designed detent clutch automatically disengages when a pre-set stop is reached or when cutting pressures become excessive
- A 1-1/2-18 threaded back permits the use of any of the 1-1/2-18 threaded shanks and adapters shown above

Criterion Bridgeport Boring Head Sets

MADE IN THE USA

Criterion Machine Works has made available a number of boring head sets specifically selected for Bridgeport Mills. These sets include a standard Criterion Boring Head with an R-8 shank and a wide range of boring tools and boring bars. The boring tools are available in either a C-2 or C-6 grade of carbide. C-6 Standard, C-2 by special order only.

GE601100A Set

This set covers a boring range of 1/8" to 8-5/8" and consists of the following items.

- 1- CB-202 boring head
- 1- R-8 shank
- 1- SBT-125B boring tool 1/8" bore diameter
- 1- SBT-187B boring tool 3/16" bore diameter
- 1- SBT-250B boring tool 1/4" bore diameter
- 1- SBT-312B boring tool 5/16" bore diameter
- 1- SBT-375B boring tool 3/8" bore diameter
- 1- SBT-500B boring tool 1/2" bore diameter

TG Style Collet Holders

Rapidhold:
- All collet chucks are supplied with depth set screws
- Collet seat taper T.I.R. greater than 0.0002”
- Produced according to AT3 specifications
- Tools are made of a high quality steel
- Through the spindle coolant capability
- Dynamically balanced to G6.3 @ 15,000 RPM
- All balanced tools are supplied with QA certificate

Parlec:
- Constructed of alloy steel for long, durable service life
- Hardened to RC 52-56 to avoid damaging collet chuck threads
- Collet seat taper T.I.R. greater than .0002”
- Collet face within .06 of nut face for maximum rigidity
- Through-spindle coolant capability
- Parsymmetry™ design for high-speed operation

Techniks:
- .0002” concentricity or less from shank to bore
- Black oxide prior to finish grind
- External threads are finished ground for best collet nut concentricity
- Will work with any TG75 series collet

Briney:
- .0002” concentricity or less from taper shank to bore
- Black oxide prior to finish grind
- External threads are finished ground for best collet nut concentricity

Double Angle (DA Type) Collet Holders

Parlec:
- Collet seat taper T.I.R. ≤ .0004”
- Through spindle coolant capability
- Parsymmetry™ design for high speed operation

Rapidkut:
- Balanced by design
- Through spindle coolant capability
- Dynamically balanced to G6.3 @ 15,000 RPM

Techniks:
- .0002” concentricty or less from shank to bore
- Black oxide prior to finish grind
- Extrenal threads are finished ground for best collet nut concentricity
- Will work with any DA200 series collet

Briney:
- .0002” concentricty or less from taper shank to bore
- Black oxide prior to finish grind
- Extrenal threads are finished ground for best collet nut concentricity

Individual Inch ER Spring Collets

- ER spring collets are the only clamping collet system for combined milling, drilling, reaming, tapping and boring
- ER collets concentricity guaranteed to .0004”
- Wide holding range of each collet requires fewer collets and changes - guarantees that undersize cutting tools can be held without sacrificing accuracy or gripping power
- Unique self-releasing system eliminates sticking
- Flute holding capabilities for highest concentricity and clamping power
- ER mini-collet chucks allow for machining in tight locations with reduced outside nose diameter
- Clamping range is .039”

Individual Metric ER Spring Collets

Features:

- ER Spring Collets are the only Clamping Collet System for combined milling, drilling, reaming, tapping and boring
- ER Collets concentricity guaranteed to .0004”
- Wide holding range of each collet requires fewer collets and changes - guarantees that undersize cutting tools can be held without sacrificing accuracy or gripping power
- Uniqure self-releasing system elimiates sticking
- Flute holding capabilities for highest concentricity and clamping power
- ER Mini-Collet Chucks allow for machining in tight locations with reduced outside nose diameter
- Clamping range is .039”

Ultra Precision Collets - Inch

RAPIDHOLD ULTRA PRECISION COLLETS:

- Inch & Metric sizes
- Made with high quality bearing steel and heat treated for high flexibilty and long life
- Made in DIN6499 - 0..0002" T.I.R.
- Wide clamping range with 0.02 - 0.039" collapsibility

REGO-FIX ER ULTRA PRECISION COLLETS:

- High precision collets combine the advantages of DIN 6499/ ISO 15488 A + B
- T.I.R. ≤ 5µm over the entire clamping range
- Clamping range from diameter 0.2mm up to 36mm

PARLEC ER GRADE AA 5 MICRON COLLETS:

- Evenly distributed cutting edges for high performace machining .0002" (5 micron) gage tolerance
- Exceeds DIN requirements
- 12 slots, deburred and polished
- Increased grip force with reduced friction to collet seat

ER System Clamping Nuts

- Hi-Q®/ER Clamping nuts with corrosion resistant surface are standard on all REGO-FIX® ER toolholders
- Hi-Q®/ERC Clamping nut is intended for use with the sealing disk system DS/ER and the coolant flush system KS/ER. These systems allow the use of all standard ER collets, ultra precision collets and tapping collets to be used in coolant applications. Up to 2000PSI Coolant pressure. Peripheral cooling of non-coolant through tools
- HI-Q®/ERC11 clamping nut is a one piece nut and disk system with built in o-ring seal for coolant through tools. Does not require sealing disks. Up to 2000PSI Coolant pressure. Intergrated seal prevents dirt and chips from entering collet
- HI-Q®/ERAX Clamping nut is used for floating chucks and other ER toolholders with internal thread
- HI-Q®/ERAXC / ERBC / ERMC Clamping nuts are intended for use with the sealing disk systems DS/ER and the cool flush system KS/ER. The disk system allows the use of all standard ER collets, ultra precision collets and the tapping collets for coolant through tools
- HI-Q®/ERB Clamping nut is a friction-bearing nut that offers the highest clamping force available
- HI-Q®/ERM Mini Clamping nut is recommended for use where minimal external diametes are important

Features:

- Collet locking to keep collet from coming out during assembly
- Balanced by design for high speed machining
- Special corrosion resistant treatment to redude friction between collet and nut, increases clamping force by up to 120%

ER System Collet Coolant Rings

Techniks:
- Seals up to 1,500 PSI
- Use with precision ER collets
- Seals collet pocket from contamination
- Use with Technik Power Coat coolant nuts

Rego-Fix:
- Seals up to 2,000 PSI
- Seals collet pocket from contamination
- Work with all REGO-FIX coolant nuts
- 0.5mm Sealing range per disk
- Made in Switzerland to ISO 9001/ISO 14001

ASSEMBLING: Insert the small diameter of the disk into the center of the coolant nut and apply even pressure until the disk is properly seated into the nut. The disk must be flush with the outside of the nut and the marking on the disk must be seen inside the nut

REMOVING: To remove the disk, simply press on the outside of the disk evenly until it snaps out

Briney Eccentric Bore Tool Holders

MADE IN THE USA

- Tru Position eccentric bore tool holders have a special proven grinding technique design that dramatically reduces total indicator runout (T.I.R.)
- Average .0001" concentricity finished tool holders with eccentric ID guaranteed .0002" (note tool must be installed)
- Tool pulls within .0001" of centerline once set screw is tightened
- Holders are offset .0003"
- ISO 9001 certified

† Single End Endmills only

Briney NMTB End Mill Adapters

- Tru Position Design - A special eccentric grind technique reduces runout to .0002” when tool is installed into holder
- Twice the tool life you can get with any other end mill holder, plus half the tooling replacemnet expense because tools last longer due to even chip load and less chatter due to Briney`s special grind process
- Fewer passes to mill slots because of improved on-center rotation, saving time and improving machining quality
- Black oxide prior to finish grind
