ISCAR TOOL ADVISOR

Your Tool Advisor Genius

start

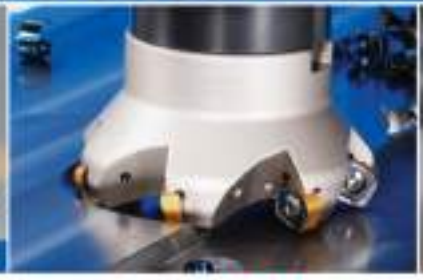
Online Data to Maximize Productivity

Features:

- Quick Search
- 3 Best Tool Options
- Up to 25 Tool Alternatives
- Sorting Options
- Considers Your Machine's Parameters
- Provides Cutting Conditions, Power Requirements and Metal Removal Rates

EC E-Catalog | Photo | Video | DXF | 3D STP

Let ITA Help You to Select the Most Productive Tool



HELITURN LD | HELIDO 883 LINE | PENTACUT PARTING GROOVING LINE | DRDRILLS

Member IMC Group

ITA recommends the optimal tool based on application parameters and your machine power.
3 tool options, 25 alternatives, cutting data, power consumption, cutting time, metal removal rates, engineering support and more

ISCAR GRADE CHART

Application Range And Coating Data For The Most Popular Grades

Cutting material grades	Range**	Coating	Application
			MILLING
IC830	P20-P40	PVD - TiAlN	
IC330	M30-M40	PVD - TiN+TiCN	
IC810	K15-K30	PVD - TiAlN	
IC26	N10-N30	Uncoated	
IC840	M20-M40	PVD - TiAlN	
IC802	S20-S30	PVD - AlTiN	
IC808	H10-H20	PVD - TiAlN	
			SOLID CARBIDE ENDMILLS
IC903/909	P15-P40	PVD - TiAlN	
	K05-K25	PVD - TiAlN	
	S15-S25	PVD - TiAlN	
IC26	N05-N20	Uncoated	
IC902	H01-H05	PVD - TiAlN	
			DRILLING
IC909/909	P15-P30	PVD - TiAlN	
	M20-M30	PVD - TiAlN	
	K20-K40	PVD - TiAlN	
	S15-S30	PVD - TiAlN	
	H10-H20	PVD - TiAlN	
IC26	N10-N25	Uncoated	
			PARTING
IC830	P20-P50	PVD - TiAlN	
IC5400	M20-M50	MT-CVD - TiCN+Al_2O_3	
IC807	K10-K30	PVD - TiAlN	
	S05-S40	PVD - TiAlN	
	H05-H15	PVD - TiAlN	
IC20	N05-N25	Uncoated	
			GROOVE TURNING
IC830	P15-P30	PVD - TiAlN	
	M20-M50	PVD - TiAlN	
IC5010	K10-K20	CVD - TiCN+Al_2O_3	
IC807	S05-S20	PVD - TiAlN	
IB90	H05-H15	Uncoated	
IC20	N10-N25	Uncoated	
			FACE GROOVING
IC830	P15-P30	PVD - TiAlN	
	M20-M30	PVD - TiAlN	
	S15-S25	PVD - TiAlN	
	H10-H20	PVD - TiAlN	
IC5010	K10-K20	CVD - TiCN+Al_2O_3	
IC20	N05-N25	Uncoated	
			ISO TURNING
IC8250	P10-P30	MT-CVD - TiCN+Al_2O_3	
IC9025	M20-M50	MT-CVD - TiCN+Al_2O_3	
IC5010	K05-K15	CVD - TiCN+Al_2O_3

IC830	S15-S25	PVD - TiAlN	
IB20H	H10-H20	Uncoated	
			THREADING
IC835	P15-P30	PVD - TiAlN	
	M20-P30	PVD - TiAlN	
	N15-P25	PVD - TiAlN	
	S10-S25	PVD - TiAlN	
IC1007	K20-P40	PVD - TiAlN	

* Solid Carbide

** ISCAR material groups in accordance with ISO 513 standard

*** In accordance with ISO 513 standard

Type Of Wear And Remedy

Flank wear	Crater wear	Notch wear	Chipping	Fracture	Comb cracks	Built-up edge	Plastic deformation
Possible causes: • Cutting speed too high • Heat developed too high • Carbide grade too low-wear	**Possible causes:** • Cutting speed too high • Heat developed too high • Feed too low	**Possible causes:** • Cutting speed too High • Carbide grade too low-wear	**Possible causes:** • Carbide grade too wear-resistant • Cutting edge too positive • Formation of edge	**Possible causes:** • Cutting edge too positive • Carbide grade too rigid • Vibrations	**Possible causes:** • Work alternating in edge • Strongly interrupted cut • Thermal shock through coolant	**Possible causes:** • Low cutting speed • Feed too low • Cutting edge too negative	**Possible causes:** • Feed too High • Cutting speed too high • Carbide grade too tough
Possible remedy: • Reduce cutting speed • Harder carbide grade • Smaller lead angle	**Possible remedy:** • Reduce cutting speed • Harder carbide grade • Increase feed	**Possible remedy:** • Reduce cutting speed • Harder carbide grade • Less cutting depth	**Possible remedy:** • Tougher carbide grade • Higher cutting speed • Choice of more stable cutting edge	**Possible remedy:** • Reduce cutting depth • Lower feed • More stable cutting wedge	**Possible remedy:** • Choice of tougher carbide grade • Improved coolant supply • Dry machining	**Possible remedy:** • High cutting speed • Increase feed • Wiper, positive cutting edge	**Possible remedy:** • Reduce cutting speed • Reduce feed • Choice of harder carbide grade

TANG-GRIP PARTING LINE — TANG-GRIP Parting and Grooving Inserts

- Grade IC808
- TiAlN PVD coated insert is good for steel, stainless steel, alloys and hard materials

Tool Blocks

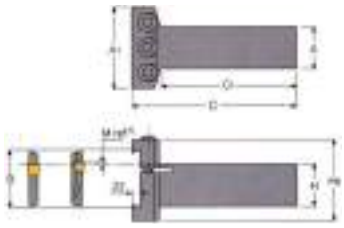
Basic Features:
- Wedge clamping
- Prism on top and bottom secures central alignment of insert in seat
- Molded chipformer produces curled and narrowed chip for free flow and undamaged surface
- Large variety of machining applications
- Parting off and grooving
- Face grooving—trepanning, slot milling
- Cutting force enhances grip

F-W Cutoff Tool System
The lastest enhancement combines the System-W geometry with its double chipformer that excels in the machining of stainless steels and exotics, and the System-F concept, which features a redesign of the insert locking mechanism for greater stability and consistency. The result, System F-W, is available in the most critical sizes for those tough applications. If you have problems with inserts splitting while cutting or just need to do your cutoff application faster, try our System-F and System F-W cutoff tools. The following pages contain the components for the F-Cut and T-Cut System.

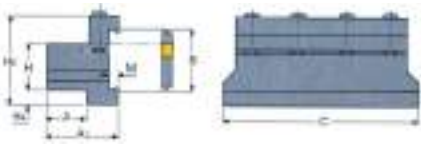
SGTBR/L
R-Right hand
L-Left hand
SINGLE-ENDED: Used in universal turning machines. Equipped for center height adjustment of cutting edge.

SGTBU-G
REMOVABLE TOP CLAMP: Used in CNC turning center. Specially for machines where the tool stations require lateral access to the tool holder screws.

SGTBF
SQUARE SHANK PERPENDICULAR TO BLADE ADAPTER: Used mainly for face grooving. Also for cut-off and grooving on tool stations parallel to machine spindle.



SGTBN
INTEGRAL FLEXIBLE CLAMPING: Applies for right and left hand turning. Cutting-edge height equals shank height. Used on CNC and universal turning machines.



SGTBK
HEAVY DUTY APPLICATIONS: Wedge clamp strengthens hold on blades.
Best for large widths of cut and high loads.

UBHCR/L
R-Right hand
L-Left hand
UNIVERSAL TOOL BLOCK: To be mounted on CNC machine turrets. Using half and full length self-grip blades with a separate short clamp, holder block and blades are clamped separately.

F-CUT: Fixed location of cutting edge provides repeated accuracy of depth of cut for:
- Pre-cutoff position
- Grooving
- Post-cutoff position
- Accuracy of center height of cutting edge
- Stopper ensures repeatability
- Stopper limits load on jaws
- Flush top for unobstructed chipflow

NOTE: F-CUT and T-CUT inserts are not inter-changeable with F-CUT and T-CUT blades.

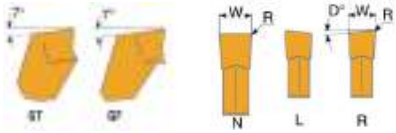
GFN/R/L-W F-CUT Parting & Grooving Inserts

N = Neutral
R = Right hand
L = Left hand



T-CUT: The original self-grip
With high reliability
- High rigidity and high stability
- Superior straightness of cut

F-CUT: Fixed location of cutting edge provides repeated accuracy of depth of cut for:
Pre-cutoff position
- Grooving
- Post-cutoff position
- Accuracy of center height of cutting edge
- Stopper ensures repeatability
- Stopper limits load on jaws
- Flush top for unobstructed chipflow

W-Type: Central ridge and double cavities. Most efficient on stainless steel and most types of steel at moderate feed rates.

J-Type: Positive rake and sharp curved cutting edge. For smooth chip flow and better surface quality at low feeds down to .0012 ipr. For stainless steel, steel and soft materials.

A-Type: Positive rake cavity and shoulders. For cutting ductile metals like aluminum and copper.

IC-20 Grade C2-C3 uncoated
IC-328 PVD TiCN coated - heavy machining
IC-354 Grade C5-C6 PVD TiCN coated
IC-54 Grade C4-C5 uncoated

Grade IC-354 replaces IC-656

Width of Cut (WOC) and depth of Cut (DOC)
In selecting WOC, the main factor to consider is the required DOC. The ratio DOC above 8x WOC is of practical use on alloy steel of average machinability: for example, applying a .118" WOC insert GFN-3 to cut-off a 1.890" solid bar.

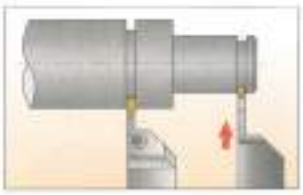
Additional factors which affect DOC capacity, relative to the ratio, are:

Lead Angle
A neutral insert with 0° lead angle increases DOC capacity.

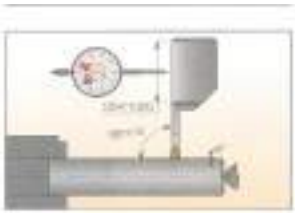
Holder or Blade Size
To minimize risk of vibration and deflection always choose:

- Blade or toolholder with smallest possible overhang
- Toolholder with maximum shank dimension
- Blade height (B) dimension which is larger than Tmax
- Blade or holder with maximum blade width (largest possible insert seat size.)

Example:
A WOC .374" on blade
SGFH 53-9 (B=2.07") extends the ratio of DOC to WOC by some 50% to 4.724".



Insert Support
A self-grip tool is recommended for deep radial machining. A screw-clamp holder is recommended for axial and small DOC machining.



90° Mounting
It is very important that the insert is mounted at 90° to the center line of the workpiece in order to obtain perpendicular surfaces and reduce the risk of vibration.

TGIR/L-C Internal Machining Boring Bars with Coolant

TOP-GRIP
ISO 9001

Applications:

- Grooving
- Turning
- Threading

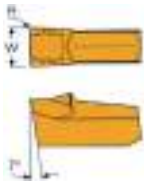
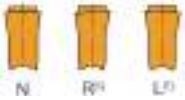
IC20	Grade C2-C3 uncoated
IC354	Grade C5-C6 PVD coated (medium speed, high feed)
IC54	Grade C4-C5 uncoated
IC635	Grade C5-C6 CVD coated (low speed, high feed)

GFF F-CUT Inserts



F-CUT: Fixed location of cutting edge provides repeated accuracy of depth of cut for:

- Pre-cutoff position
- Grooving
- Post-cutoff position
- Accuracy of center height of cutting edge
- Stopper ensures repeatability
- Stopper limits load on jaws
- Flush top for unobstructed chipflow



(1) GFF 3 R shown, right-hand for CCW rotation.
(2) GFF-3 L shown, left-hand for CW rotation.

GHDR/L Toolholders for Turning and Grooving

Tools for multidirectional machining. The GHD group is designed for grooving, threading, turning, profiling and parting with maximum stability. Tools with insert widths between .118, .250 and .315-.394 inch can be used for grooving depths of .394-.473 and 1.0 inch respectively.

CUT-GRIP GIF Precision Inserts for External Grooving

Repeatability ±.001

• Precision-ground • Double-ended • F-type chipformer (E-Honed)

GRIP SYSTEM Groove-Turn

Multifunction Operations

The Groove-Turn tools are multifunction tools, able to operate in a sequence of grooving and turning modes. Moving from turning to grooving requires consideration of the basic Grip principle, thereby eliminating the possibility of insert breakage. In this situation one must release the side deflection which is necessary in turning, but not recommended in grooving.

The following machining sequence is suggested:

After completing the longitudinal turning, but before starting the grooving, the side deflection must be released. Move the tool in the direction opposite that of feed, approximately .004“, and return to the original position without side load.

Then, after the deflection has been released and the holder is perpendicular to the workpiece, the grooving operation may start.

H490 End Mills

Double-Sided Inserts with 4 Helical Cutting Edges for 90º Milling

- Due to its strong construction, unique chip deflector with positive cutting angles and excellent grade combinations, this new family features hight durability, low cutting forces and long tool life
- HELIDO tools can be used for machining steel, stainless steel, and cast iron at very high machining parameters

HELIDO S845 LINE Up Feed End Mills

Combination Inserts with 6 Cutting Edges

- HELIDO-FEEDMILL trigon double-sided, 6-edged insert combines HELIDO's strength and FEEDMILL's special geometry to facilitate milling at very high feed rates of up to .08 IPT for high volume metal removal
- All of the tools have coolant holes and can be used for facing, ramping, plunging and helical interpolation applications, achieving excellent performance and tool life

HELIDO ROUND H400 LINE HELIDO H400 End Mills

A Revolutionary Double-Sided Profiling Insert

- Double-sided multi-radius insert configuration for profile milling applications
- Four 120º segments of 0.236" radius round cutting edges
- Uses insert H400RNHU

Depth of cut-- .340

HELIQMILL 390 LINE HM390 ETP-10

90° Endmills Carrying the HM390 TPKT 1003 Triangular Inserts with 3 Helical Cutting Edges

- The construction of the new inserts is stronger compared to current 2-edged inserts
- The new family ensures productive milling of true 90° shoulders, providing an improved cost per cutting edge for various milling applications
- The HM390 TPKT 1003PDR insert features .315" maximum depth of cut
- Due to their advanced cutting geometries, the inserts reduce cutting forces and power consumption

HELIDO S845 LINE 45º End Mills

With Double-Sided Inserts

- 45º Milling cutters can carry in their pockets either the S845 SNMU1305 or the ONMU 0505
- S845 SNMU 1305- square, double-sided inserts with 8 cutting edges
- ONMU 0505- octagonal, double-sided inserts with 16 cutting edges-- the most economical inserts regarding price per cutting edge
- Both inserts have helical cutting edges and positive rake angles, featuring low power consumption and excellent surface finish

HM390 FTD-15 Face Mills

90° Face Mills carrying the HM390 TDKT 1505 Triangular Inserts with 3 Helical Cutting Edges

- The construction of the new inserts is stronger compared to current 2-edged inserts
- The new family ensures productive milling of true 90° shoulders, providing an improved cost per cutting edge for various milling applications
- The HM390 TDKT 1505PDR insert, .512" maximum depth of cut
- Due to their advanced cutting geometries, the inserts reduce cutting forces and power consumption

IQ845 FSY-R07 Face Mills

Face Mills, Carrying Square Inserts with 8 Cutting Edges

- IQ845 FSY-R07 are indexable face mills carrying the IQ845 SYHU 0704 square double sided inserts with 8 cutting edges
- The new face mills can machine up to .180" depth of cut. They are available in nominal diameter ranges of 2.0 to 6.0 inch in both coarse and fine pitch configurations
- The new tools can be used in a wide range of face milling applications, roughing and finishing on a very wide range of engineering materials, including hard to cut austenitic stainless steel

MILL2000 Inserts

These new 3M AXKT inserts have helical cutting edges and positive rake angles that reduce the cutting forces resulting in smooth, efficient operation. The inserts are available with .512 and .787 inch cutting edge lengths for use on heavy duty applications. They may be mounted on face mills, end mills and extended-flute cutters.

MULTI-MASTER Indexable Solid Carbide Milling Heads

MM ETR 6 Flute Torodial Head

- Torodial shape, excellent for die and mold applications
- Typical applications: cavities, fillets, pockets and helical interpolations
- Tapered contour enables machining of 90º high walls
- Very efficient for machining hardened steel
- Available in a selection of corner radii
- Grade IC908- Good for wide range of materials

MULTI-MASTER Indexable Solid Carbide Milling Heads

MM HBR High Precision, Spherical Design Milling Head

- High accuracy
- May be used for both roughing and precision finishing applications
- 240º spherical cutting profile
- Ground, neutrally inclined rake
- Center cutting
- Recommended for finishing and may be used on hardened steel
- 2 flute
- Grade IC908- Good for wide range of materials

MULTI-MASTER

Indexable Solid Carbide Milling Heads

MM HCR 2 Flute Ball Nose Milling Head

- Unique cutting geometry similar to our HELIBALL inserts
- Center cutting
- Closed tolerance
- May be used for both roughing and precision finishing applications
- Grade IC908- Good for wide range of materials

Iscar No.	Cutter Dia. (in.)	Radius	Depth of Cut	Connection	Order No.	Price

MULTI-MASTER

Indexable Solid Carbide Milling Heads

MM HT 2 Flute Torodial Head

- Ground, neutrally inclined rake face
- Tapered contour enables machining of 90º high walls
- May be used for machining hardened steel

3“ Shank Length

DR-TWIST INDEXABLE DRILL LINE Twist Indexable Drills Inserts

IC808 – A hard, fine grain substrate with excellent chipping resistance, combined with a new “SUMO TEC” TiAlN PVD coating. Provides high wear resistance. Recommended for a very wide range of materials.
IC908 – A hard, fine grain substrate with excellent chipping resistance, combined with a Ti AlN PVD coating. Provides high wear resistance. Recommended for a very wide range of materials.
IC8080 – A hard, fine grain substrate with “SUMO TEC” MTCVD alpha Al203 coating. Features excellent chipping and wear resistance. Recommended for high speed drilling of cast iron and steel, to be used for the peripheral insert on DR drills.

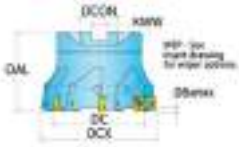
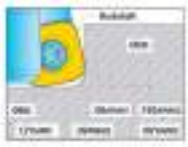
GOLD QUAD High Feed Face Mills

Series 5G5F / 5G6F





For use with the following:

- SDXS0904MPR-MR1 - specifically for Ti and hi-temps
- SDXS0904MPR-MM - for aggressive feed rates in stainless
- SDXS0904MPR-MR - designed for low cutting forces in low-alloy to high allow pre-hard steels
- SDXS0904MPR-MRH - reinforced cutting edge ideal for continuous machining in hardened steel

POWEROFEED13+™

High Feed Indexable End Mills

Modular • - 1DG1P

- .078 Maximum depth of cut
- Double-sized insert technology offers 6 cutting edges for great economy
- Unique insert seating design provides excellent stability in the cut
- Through coolant

QUADeTWIST

Ingersoll Cutting Tools

QR SERIES Indexable Drills

- 4 Cornered economical insert design
- Side coolant port
- Twisted flute for maximum chip evacuation

Type - 2XD Twisted Flute

Note: Coolant plugs PF0012 & PF0013 are ordered separately.

Iscar QR DRILL INSERTS

- IN1030 (PVD) – tough applications
- Cast iron, aluminum, stainless, titanium applications
- Sub-micron grade with high hardness and toughness
- TiCN coated
- First choice for tough applications
- IN2505 (PVD) – general purpose
- Sub-micron grade with high hardness and toughness
- New multi-layered coating for higher chipping resistance

Type - Drilling Insert

- Post-coat surface treatment improves chipping resistance and reduces cutting forces
- First choice for general applications
- Inboard and outboard pockets
- IN6505 (CVD) - steel applications
- Multi-layered CVD coating along with post coat surface treatment provides excellent wear resistance
- Peripheral (outboard) pocket only

CHIPBREAKER	APPLICATION INFORMATION
TSF	General purpose finishing for steels
TM	Medium cutting general purpose application
TH	Heavy duty cutting including interruption and irregular surface conditions
PS	For general purpose boring applications
PM	General to rough boring applications
SS	For finishing applications in stainless steel
CF	For finishing applications in cast iron
CM	For medium applications in cast iron
CH	For roughing applications in cast iron
SA	For finish cutting in super alloys
HMM	Light to moderate cutting conditions with super alloy applications
AL	For non-ferrous boring applications
PSF	For finish machining processes
PSS	For medium to semi finishing processes
TN28	For general turning of non-ferrous metals

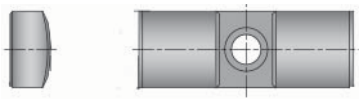
DEEP TORX DRILL GP Guide Pads

For MCTR Drills

- Guide pads are subject to wear, like inserts
- Each guide pad has 2 corners
- When the width of wear on the 1st corner reaches 70% of the width of the guide pad, reverse the guide pad and use the 2nd corner
- Replace the guide pad with a new one when the 2nd corner shows the same wear as the 1st corner
- Grade F2122 is the first recommendation, suitable for various workpiece materials, long tool life due to unique substrate and coating
- Grade F1122 is for high wear resistance



Grade - F1122

DEEP TORX DRILL TOHT Drilling Inserts

For MCTR Drills

- AH725 grade is TiAlN coated and is good for low carbon steels, carbon steels, alloy steels, prehardened steels, and stainless
- NDJ chipbreaker - low cutting force, for general purpose

DOFEED High Feed Indexable End Mills

HXN Style

- High productivity with excellent chip evacuation and remarkable chip control
- High feed per tooth up to 2mm (.079")
- Economical insert with 4 cutting edges
- Center through coolant
- Low cutting force design
- Wiper insert for excellent surface finish and high feed rate, eliminating semi-finishing operation

Jobber Drills

High Speed Steel • 118° Standard Point • Bright Finish

- General purpose drills suitable for most applications
- Ground from solid
- Bright finish - works well in a wide variety of materials
- Polished flutes help with chip evacuation
- Designed for high production drilling of a wide variety of materials and under many different operating conditions
- Morse List #1330B
- Precision Twist List #R10P

MORSE CUTTING TOOLS — Designed for production drilling in a wide variety of materials. Consistent performance for lower overall tooling costs. Made in USA.

PROCUT — General purpose cutting tools, imported from world class manufacturers, that provide productivity at the most economical prices.

Precision - Performance - Productivity — Cutting tools engineered for application versatility and maximum productivity.

RAPIDKUT — Manufactured in the USA to exacting tolerances. High quality tooling at the most competitive price in the industry!

Jobber Drills

High Speed Steel • 118° Standard Point • Bright Finish

- General purpose drills suitable for most applications
- Ground from solid
- Bright finish - works well in a wide variety of materials
- Polished flutes help with chip evacuation
- Morse List #1340B
- Precision Twist List #R18P

MORSE CUTTING TOOLS — Designed for production drilling in a wide variety of materials. Consistent performance for lower overall tooling costs. Made in USA.

Precision - Performance - Productivity — Cutting tools engineered for application versatility and maximum productivity.

PROCUT — General purpose cutting tools, imported from world class manufacturers, that provide productivity at the most economical prices.

RAPIDKUT — Manufactured in the USA to exacting tolerances. High quality tooling at the most competitive price in the industry!

Jobber Drills

High Speed Steel • 118° Standard Point • Bright Finish

- All drills ground from the solid
- Bright finish - works well in a wide variety of materials
- Polished flutes help with chip evacuation
- Morse List #1332B
- Precision Twist List #R15P

Jobber Drills

High Speed Steel • 118° Standard Point • Surface Treated

- General purpose drills suitable for most applications
- Ground from solid
- Surface treated - provides high resistance to abrasion and helps reduce the tendency of soft materials to load on the drill
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #1330
- Precision Twist List #R10

MORSE CUTTING TOOLS — Designed for production drilling in a wide variety of materials. Consistent performance for lower overall tooling costs. Made in USA.

PROCUT — General purpose cutting tools, imported from world class manufacturers, that provide productivity at the most economical prices.

Precision - Performance - Productivity — Cutting tools engineered for application versatility and maximum productivity.

RAPIDKUT — Manufactured in the USA to exacting tolerances. High quality tooling at the most competitive price in the industry!

Jobber Drills

High Speed Steel • 118° Standard Point • Surface Treated

- Ground from solid
- Surface treated - provides high resistance to abrasion and helps to reduce the tendency of soft materials to load on the drill
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #1332
- Precision Twist List #R15

TiN Tip and TiN Coated Jobber Length Drills

High Speed Steel • 118° Split Point

- TiN tip increases tool hardness and improves tool life
- Dormer List #A012

TiN Coated 118° Jobber Drills

- High speed steel
- Titanium nitride coated
- Offers outstanding wear resistance, reduces friction and prevents galling
- Increased lubricity and chip low
- Provides better surface finish
- Allows for increased speeds and feeds to improve productivity

†Sizes smaller than #46 (.0810) have a 118° 4-facet point and are bright finish

HSS MORSE M GP Metric Jobber Drills

High Speed Steel • 118° Point • Surface Treated
Cobalt • 135° Split Point • Bronze Color

- Designed for the drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #1333 (high speed steel) - 2345 (cobalt)

Standard Package Quantities:
.35mm thru 9.5mm — 12 each
9.6mm thru 13mm — 6 each
13.5mm thru 17.5mm — 1 each

Metric Jobber Drills

High Speed Steel • 118° Point
Cobalt • 135° Split Point

High Speed Steel - 118° Point
- Designed to perform satisfactorily under a wide variety of normal conditions
- Will work in a broad range of materials and in various types of drilling equipment, both machine and portable

Cobalt - 135° Split Point
- Designed for drilling in stainless steel, titanium and other high tensile strength materials
- Manufactured to NAS 907 Type J Aerospace standards

PROCUT Metric Jobber Drills

High Speed Steel • 118° Point
Cobalt • 135° Split Point

High Speed Steel - 118° Point

- Designed to perform satisfactorily under a wide variety of normal conditions
- Will work in a broad range of materials and in various types of drilling equipment, both machine and portable

Cobalt - 135° Split Point

- Designed for drilling in stainless steel, titanium and other high tensile strength materials
- Manufactured to NAS 907 Type J Aerospace standards

Heavy Duty Jobber Drills

High Speed Steel • 135° Split Point

- Heavy duty (NAS 907 Type B)
- Originally designed to drill cotter pin holes, these heavy duty drills are suitable for drilling high tensile strength steels
- 135° split point is self-centering, and reduces “walking” at the drill point
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- **Fractional sizes 3/64 and smaller are NOT split point**
- Morse List #1385
- Precision Twist List #R10B

† Sizes not split point

Heavy Duty 135° Jobber Drills - Letter Sizes

High Speed Steel • 135° Split Point

- Heavy duty (NAS 907 Type B)
- Originally designed to drill cotter pin holes, these heavy duty drills are suitable for drilling high tensile strength steels
- 135° split point is self-centering, and reduces “walking” at the drill point
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #1385
- Precision Twist List #R15B

† Precision Dormer “E” use PT1210216

HSS M GP Ambore™ Wide Land Parabolic Flute Jobber Length Drills

High Speed Steel • 135° Split Point • Heavy Duty

- 135° Self-centering point eliminates “walking” and reduces thrust
- Parabolic flute design enhances chip flow, coolant flow, and heat dissipation especially in deeper drilling operations
- Recommended for a wide range of material types
- Morse List #1354

Heavy Duty Jobber Drill Sets

High Speed Steel • 135° Split Point • Surface Treated

- Includes 29 Pieces 1/16” - 1/2” x 64ths
- Complete with index
- 135° Split point is self-centering and reduces “walking” at the drill point
- Drills ground from solid

Brand	Set Range	Order No.	Price
RAPIDKUT	1/16" - 1/2" by 64ths	AP50C162HDSP	Price
HSS M GP	1/16" - 1/2" by 64ths	MT1218172	Price

Drill Stop Sets

- For twist or brad point drills
- Assures exact hole depth
- Prevents damage from excessive drill penetration

Heavy Duty Jobber Drill Set

High Speed Steel • 135° Split Point

- 29 Piece set, includes 1/16" - 1/2" x 64ths, plastic index
- Unique surface treatment for improved wear resistance in hard ferrous alloys
- Precision Twist List #HX10

Order No.	Price
PT2791010	Price

RAPIDKUT® Premium Heavy Duty "Dyno Drill" & Morse Ambore Jobber Drills

High Speed Steel • 135° Split Point • Gold with Black Oxide Surface Treatment

- Suitable for drilling high tensile strength steels
- The 135° split points are self-centering and prevent "walking"
- Available in fractional sizes only
- Morse List #1384

Heavy Duty Jobber Drills

Cobalt • 135° Split Point

- For drilling in tough, high tensile strength materials like stainless steels, titanium and inconel
- Made of heat resistant cobalt high speed steel
- Made to NAS907 Type J specifications
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #2330
- Precision Twist List #R10CO

Heavy Duty Jobber Drills

Cobalt • 135° Split Point

- For drilling in tough, high tensile strength materials like stainless steels, titanium and inconel
- Made of heat resistant cobalt high speed steel
- Made to NAS907 Type J specifications
- Designed for high production drilling of a wide variety of materials
- Perform well under many different operating conditions
- Morse List #2332
- Precision Twist List #R15CO

Ex-Gold® Jobber Length Drills

Cobalt • 130° Point • TiN Coated EXOCARB

- Patented drill point eliminates the need for a center drill
- Recommended for cast iron, carbon steels, alloy steels and die steels up to 20 HrC
- OSG List #1500

HSS M GP Left Hand Jobber Drill Set

High Speed Steel • 118° Point

- Complete with index
- Drills ground from solid
- Morse List #8020

No. of Pieces	Set Range	Finish	Order No.	Price
29	1/16" - 1/2" by 64ths	Bright Finish-LH	MT1218005	Price

Screw Machine Drills

High Speed Steel • 118° Standard Point • Bright Finish

- Developed primarily for use in screw machines
- The short length of these drills offers increased rigidity for strength, in machine and portable uses
- Morse List #1435
- Precision Twist List #R40

29 Pc. Screw Machine Drill Set

High Speed Steel • 118° Standard Point

- Includes 1/16" thru 1/2" by 64ths
- Drills ground from solid
- Bright finish

Brand	Order No.	Price
Morse Cutting Tools	MT1218177	Price
Precision Twist Drill	PT2790170	Price
Rapidkut	AP50S70H	Price

Screw Machine Drills
High Speed Steel • 118° Standard Point • Bright Finish

- Developed primarily for use in screw machines
- The short length of these drills offers increased rigidity for strength-in machine and portable uses
- Morse List#1437 (wire gauge) - 1436 (letter sizes)
- Precision Twist List #R41 (wire gauge) - R42 (letter sizes)

Screw Machine Drills

High Speed Steel • 135° Split Point • Surface Treated

- Manufactured to NAS 907 Type C Aircraft specifications
- Ideal for medium duty portable or machine drilling in low alloys and stainless steels
- Morse List #1398
- Precision Twist List #R40C

Screw Machine Drills

Cobalt • 135° Split Point

- Effective in high alloys and work hardening materials
- Morse List #2435
- Precision Twist List #M41CO

EX-SUS GOLD® Drill

Vanadium High Speed Steel • Stub Length • TiN Coated

- Recommended for aluminum, low carbon and medium carbon steels, 300 and 400 series stainless steels
- OSG List #1100

PROCUT Left Hand Screw Machine Drills

High Speed Steel • 118° Standard Point

- Left hand screw machine drills have a left hand helix for applications where shorter, more rigid length is required in a left hand rotation
- These drills may also be used in drilling out broken studs, bolts and screws

NOTE: Many wire gage and letter sizes in stock (while supplies last)-call for price and availability

Taper Length Drills

High Speed Steel • 118° Standard Point

- Bright finish to 1/2" diameter, surface treated over 1/2"
- Taper length drills - longer than jobber length
- Designed to perform under a variety of normal conditions and in a broad range of materials
- **Fast spiral drills provide for improved chip evacuation**
- Morse List #1314
- Precision Twist List #R51

† Black oxide treated

Taper Length Drills

High Speed Steel • 118° Point • Bright Finish

- Taper length drills - longer than jobbers length
- Designed to perform under a variety of normal conditions and in a broad range of materials
- **Fast spiral drills provide for improved chip evacuation**
- Morse List #1322
- Precision Twist List #R52

† Black oxide treated

PROCUT Taper Length Drills

High Speed Steel • 118° Point • Bright Finish

- Taper length drills - longer than jobbers length
- Designed to perform under a variety of normal conditions and in a broad range of materials

Parabolic Flute Taper Length Drills

High Speed Steel • 135° Split Point

- Effective in deep hole drilling of aluminum alloys and other low to medium tensile strength materials
- Wide land parabolic design provides superior performance in a greater range of materials and applications
- Effective in both deep and shallow hole drilling
- Self-centering positive rake point for faster penetration
- Improved chip and coolant flow
- Bright finish
- Precision Twist List #QC91P

Aircraft Extension Drills — 6" & 12" Overall Length

High Speed Steel • 135° Split Point • Surface Treated

- Ideal for drilling mild steel where extra length is required
- Manufactured to NAS 907 Type B specifications
- Precision Twist List #500-6 (6" OAL)
- Precision Twist List #500-12 (12" OAL)

Aircraft Extension Drills — 6" & 12" Overall Length

High Speed Steel • 135° Split Point • Surface Treated

- Ideal for drilling mild steel where extra length is required
- Manufactured to NAS 907 Type B specifications
- Precision Twist List #501-6 (6" OAL)
- Precision Twist List #501-12 (12" OAL)

PROCUT 3/4" Shank Drills

High Speed Steel & Cobalt Heavy Duty • 118° Standard Point

- 3" Flute length
- 6" Overall length
- High speed steel is good for drilling in low and medium strength materials
- Cobalt is good for drilling in tough, high tensile strength materials
- Designed for use on for Bridgeports, boring mill and screw machine operations

HSS MORSE GP Ambore™ Mechanic Length Drills

High Speed Steel • 135° Split Point • 3/8" Reduced Shank

- Gold and black finish
- Shorter length — in-between a jobber and screw machine length
- 3/8" Reduced shank on sizes over 13/32"
- 135° Self-centering split point eliminates "walking" and reduces thrust
- 3/16" And above feature 3-flats on shank
- Morse List #1383

V-Series Helios Drills

Cobalt-HSS • 10xD, 15xD, 20xD

- Capable of non-peck drilling up to 20xD without an internal coolant supply
- Compound flute lead construction
- 120° Point

- WXL® coating
- OSG List #1750

- 10xD Premium Cobalt HSS Drill

Taper Shank Drills *(continued from previous page)*

High Speed Steel • 118° Standard Point • Surface Treated

- Standard and alternate shanks shown
- High production drilling in a wide variety of materials
- Morse List #1302
- Precision Twist List #209, S209, L209

Straight Shank Oil Hole Drills

High Speed Steel • 118° Point

- Designed with coolant holes to help flush chips out of the hole to reduce heat and chip packing problems common to deep hole drilling applications
- Surface speeds may be increased 30% or more over standard drill styles

- Available from stock in many special diameters & odd lengths at savings of up to 75%
- Slow spiral flute also available. Please inquire.

Taper Shank Oil Hole Drills

High Speed Steel • 118° Point

- These drills feature coolant passages throughout the length of the body
- Coolant holes allow coolant (air, oil or vapor mist) to reach the cutting edges to cool, lubricate and aid in the extraction of chips

6" Extra Long 5 Pc. Masonry Drill Sets

Carbide Tipped

- 6" Overall length
- Sizes included: 1/4, 5/16, 3/8, 7/16, 1/2
- Case not included

Regular Spiral Set:

- Drill in brick, stone, concrete and sandstone
- Wide flutes provide fast dust removal in softer materials

Fast Spiral Set:

- Higher helix provides more support minimizing chipping of carbide tip
- For drilling in hard concrete aggregates and similar materials

Flute Type	Order No.	Price
Fast Spiral Set	**AW65006F**	Price

RAPIDKUT® Solid Carbide Jobber Length Drills

118° Point • Uncoated and TiAlN Coated

- Ideal for drilling cast iron and other non-ferrous materials where greater torsional stresses are encountered
- Solid carbide offers extra rigidity and is particularly recommended for use under high drilling temperatures and where the drill body must withstand continuous abrasion
- **NOTE**: Not for use in steel

RAPIDKUT® Solid Carbide Jobber Length Drills

Metric Sizes • 118° Point • Uncoated

- Ideal for cast iron and other non-ferrous applications
- Extra rigidity and is particularly recommended for use under high drilling temperatures
- Not recommended for steel
- Solid C-2 grade premium sub-micron carbide with 10% cobalt

Twister® GP Solid Carbide Jobber Drills

118° Point

- Recommended for drilling cast iron, aluminum, bronze and magnesium alloys and other abrasive, but easily machined materials
- 21° Helix
- Designed to allow high feed rates with good chip flow
- Four facet drill point minimizes drill wander and assures accurately sized holes
- M.A. Ford List #204

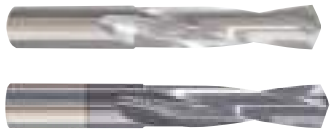
RAPIDKUT® Solid Carbide Screw Machine Length Drills

15° Helix • 135° Drill Point



- Cast iron
- Stainless steel
- Tool steel
- Titanium & nickel alloys
- C-2 grade premium sub-micron carbide with 10% cobalt
- Right hand spiral, right hand cut

				TiAlN		Uncoated

Twister® GP Solid Carbide Stub Length Drills

118° Point • 21° Helix

- Designed for drilling cast iron, aluminum, bronze and magnesium
- An extremely efficient and economical carbide drill
- Shorter overhang reduces deflection and vibration, increases drill accuracy and improves tool life
- M.A. Ford List #206

Twister® GP Solid Carbide Stub Length Drills

3xD Length • 118° Point • Uncoated

- 21° Helix
- Designed to allow high feed rates with good chip flow
- Four facet drill point minimizes drill wander and assures accurately sized holes
- M.A. Ford Series #206

RAPIDKUT® Metric Solid Carbide Screw Machine Length Drills

15° Helix • 135° Drill Point

- C-2 grade premium sub-micron carbide with 10% cobalt

For use with:

- Cast iron
- Stainless steel
- Tool steel
- Titanium & nickel alloys

				TiAlN		Uncoated

Hi-Tuff® Solid Carbide Drills

Screw Machine Length • 135° Point • Uncoated

- 12° Helix
- Designed for drilling stainless steel, tool steels, titanium, nickel base alloys and other high strength ferrous metals
- Screw machine lengths and a heavy web provide extra rigidity and strength
- Web-thinned drill point reduces power requirements, lowers drilling temperatures and extends tool life
- M.A. Ford List #205

Hi-Roc® Solid Carbide Drills

Screw Machine Length • 135° Point • Uncoated

- Straight flute
- Designed to drill hardened steel in the 42-65 Rockwell “C” range
- Produces chips without generating excessive heat
- Accurately sized holes are produced without annealing or softening the workpiece
- Reamer type finishes are easily produced
- Both a production drill and a salvage or reclaim tool
- M.A. Ford Series #200

RAPIDKUT® Solid Carbide Straight Flute Drills

140° Notched Point • Uncoated or TiAlN Coated

- Specifically designed for increased edge strength & precision tight tolerance holes
- Capable of producing reamer type finishes in work hardened and abrasive materials such as: chrome alloys, heat treated alloys, nickel alloys, titanium alloys, steel & stainless steel weldments
- C-2 grade premium sub-micron carbide with 10% cobalt

RAPIDKUT® Solid Carbide Spade Drills

- Recommended for drilling shallow holes in hard, high strength materials such as steel with a Rockwell Rc50
- Highly shock resistant
- Prolongs tool life in machining hard stainless steels & exotic metals
- Cuts tool steels that are heat treated
- Vastly increased speed and feed rates

FULLERTON Solid Carbide Composite Poly Drill

Series 5566 - 3 Flute

- Produces a clean, burr-free hole without breakout in carbon composites, fiber glass, fiber reinforced composites, plastics and green ceramics
- Three-flute design allows for ultimate material removal rates and burr teeth provide a clean shearing of fibers
- 3 Flute
- 90° Point
- Parabolic flute
- Burr teeth
- Right hand spiral, right hand cut
- Available uncoated or with FC-1 CVD diamond coating
- Shank diameter tolerance: +.0000 -.0005" / +0.000-0.013mm
- Cutter diameter tolerance: +.0000 -.0005" / +0.000-0.013mm

RAPIDKUT® 3xD High Performance Solid Carbide Drills

- For use in a wide variety of materials including carbon steel, alloy steel, stainless steel, hardened steel, cast iron, aluminum alloys, titanium and others
- 140° Point and 30° helix high performance geometry allows for high penetration rates
- These high penetration drills provide accurate hole sizing as well as near burnished holes
- TiAlN coated

DORMER ForceX High Performance Carbide Drills

3xD Length • 140° Point • TiAlN Coated

- Multi-application solid carbide drills, excellent for drilling a wide range of materials, including steel, stainless steel, cast iron & more
- 140º Point provides excellent centering capabilities
- Common shanks to cut collet cost
- Manufactured to DIN 6537
- Dormer List #R458

HY-PRO® CARB Drill

Solid Carbide • 3xD Length • TiAlN Coated

- High performance carbide
- Recommended for cast iron, carbon steels, alloy steels, die steels and hardened steels up to 35 HrC
- OSG List #HP243

RAPIDKUT® 4xD Solid Carbide Drills

140° Point • AlTiN Coated

- Advanced 140° self-centering drill point provides the fastest penetration and ultimate longevity
- Premium C-2 grade sub-micron grain carbide with 10% cobalt extends tool life
- 25° Helix
- Right hand spiral / right hand cut
- Diameter tolerance: +.0000 / -.0005"

Twister® Micro XD Drills

5xD • Solid Carbide

- Designed for high performance drilling in a broad range of materials
- Web thinned point helps reduce cutting forces during the drilling operation
- 0.8mm and above have honed cutting edges on the point which increases the strength of the cutting edges
- Post coat polishing to improve chip evacuation
- Altima® coated
- M A Ford List #MXDSR

RAPIDKUT 5xD High Performance Solid Carbide Drills

- For use in a wide variety of materials including carbon steel, alloy steel, stainless steel, hardened steel, cast iron, aluminum alloys, titanium and others
- 140° Point and 30° helix high performance geometry allows for high penetration rates
- These high penetration drills provide accurate hole sizing as well as near burnished holes
- TiAlN coated

Solid Carbide

High Performance Jobber Drills

5xD Length • 142° Point • ALtima® Coated

- ALtima® (AlTiN) coated for extended tool life
- Drills can be reconditioned and recoated
- 30° Helix angle
- Recommended for a broad cross section of materials at increased feed rates
- M.A. Ford List #2XDSR

3 Flute Solid Carbide High Performance Drills

5XD Length • 150° Point • Uncoated

- Recommended for increased speeds and feeds when drilling aluminum, cast iron and other easy to machine materials
- Greater hole dimensional accuracy at higher production rates
- Reduces drill deflection compared to HSS, cobalt and other carbide drills
- M.A. Ford Series #229

DORMER ForceX High Performance Carbide Drills

5xD Length • 140° Point • TiAlN Coated

- Multi-application solid carbide drill, excellent for drilling a wide range of materials, including steel, stainless steel, cast iron & more
- 140º Point provides excellent centering capabilities
- Common shanks to cut collet cost
- Manufactured to DIN 6537
- Dormer List #R454

RAPIDKUT® 8xD High Performance Solid Carbide Drills

- For use in a wide variety of materials including carbon steel, alloy steel, stainless steel, hardened steel, cast iron, aluminum alloys, titanium and others
- 140° Point and 30° helix high performance geometry allows for high penetration rates
- These high penetration drills provide accurate hole sizing as well as near burnished holes
- TiAlN coated

Twister GP® High Performance Solid Carbide Drills • Coolant Thru

3xD Length • 142° Point • ALtima® Coated

- ALtima® (AlTiN) coating provides for extended tool life
- Drills can be reconditioned and recoated
- 30° Helix angle
- Recommended for a broad cross section of materials at increased feed rates
- Full size range available: #31 (.1200)-5/8" and 3.0-16mm
- M.A. Ford List #204

DORMER ForceX High Performance Solid Carbide Drills • Coolant Thru

3xD Length • 140° Point • TiAlN Coated

- Multi-application solid carbide drills, excellent for drilling a wide range of materials, including steel, stainless steel, cast iron & more
- 140º Point provides excellent centering capabilities
- Common shanks to cut collet cost
- Manufactured to DIN 6537
- Complete range of sizes available, fractional & metric
- Dormer List #R457

RAPIDKUT 5xD High Performance Solid Carbide Coolant Thru Drills

MADE IN THE USA

- For use in a wide variety of materials including carbon steel, alloy steel, stainless steel, hardened steel, cast iron, aluminum alloys, titanium and others
- 140° Point and 30° helix high performance geometry allows for high penetration rates
- These high penetration drills provide accurate hole sizing as well as near burnished holes
- TiAlN coated

- Fractional

RAPIDKUT Solid Carbide Coolant Thru Inox Drills

5xD • TiAlN Coated

- Good for use on stainless steels, nickel alloys and titanium up to HRc35
- Excellent chip evacuation
- 140° Point

High Performance Carbide Drills • Coolant Thru

5xD Length • 142° Point • ALtima® Coated

- ALtima® (AlTiN) coated for extended tool life
- Drills can be reconditioned and recoated
- 30° Helix angle
- Recommended for a broad cross section of materials at increased feed rates
- M A Ford Series #2XDCR

DORMER ForceX High Performance Solid Carbide Drills • Coolant Thru

Solid Carbide • 5xD Length • TiAlN Coated

- Multi-application solid carbide drills, excellent for drilling a wide range of materials, including steel, stainless steel, cast iron & more
- 140º Point provides excellent centering capabilities
- Common shanks to cut collet cost
- Manufactured to DIN 6537
- Dormer List #R453

Type - Fractional Size

EXOPRO® Mega Muscle® Carbide Drills

Coolant Thru • 5xD Standard Length • WD-1 Coated

- High performance carbide
- Up to 200 IPM in steel and 670 IPM in cast iron
- 3 Flute
- Recommended for cast iron, carbon steels, alloy steels and 400 series stainless steels
- OSG List #5610

High Performance Carbide Drills • Coolant Thru

7xD Length • 142° Point • ALtima® Coated

- ALtima® (AlTiN) coated for extended tool life
- Drills can be reconditioned and recoated
- 30° Helix angle
- Recommended for a broad cross section of materials at increased feed rates
- M A Ford Series #2XDCL

RAPIDKUT® 8xD High Performance Solid Carbide Coolant Thru Drills

- For use in a wide variety of materials including carbon steel, alloy steel, stainless steel, hardened steel, cast iron, aluminum alloys, titanium and others
- 140° Point and 30° helix high performance geometry allows for high penetration rates
- These high penetration drills provide accurate hole sizing as well as near burnished holes
- TiAlN coated

Coolant Thru High Performance Drills

New!

Solid Carbide • 3xD to 12xD Lengths

- 140° Point
- Double margin
- 30° Helix
- Variantra ® Supral (TiAlCN) coated
- Ideal for carbon steels, alloy steels, gray cast iron, ductile iron and other alloys
- PCT Cutters List #DXC

Length - 3xD

Universal Spade Drill Blades

130° Standard & Flat Bottom CPM-4 High Speed Steel

- Universal style and high performance spade drills use the same holders
- Universal style spade drills and holders are interchangeable with most other manufacturer's products
- Flat bottom drills are used as a secondary finishing tool for bottoming and finishing flat bottom holes

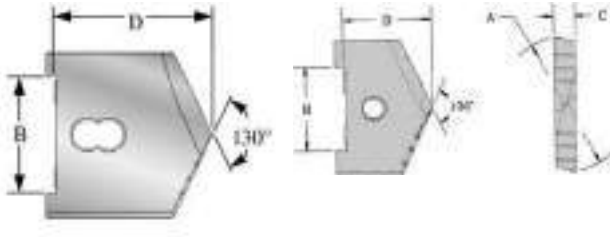
Series H blades available up to 8-1/2" size. Please inquire.

High Performance Spade Drill Blades



TiN Coated 130°

Offers higher production levels than universal style spade drills. Reduced length and unique geometry improves rigidity while coating, increases tool life and performance. Increased performance levels of 100% to 500% are not uncommon.

- High performance spade drills use the same holders as the universal style blades.
- High performance spade drills and holders are interchangeable with most other manufacturer's products
- TiN coated blades increase tool life 3 to 10 times that of uncoated tools
- Largest inventory of spade drill products in the United States

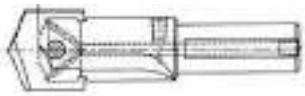
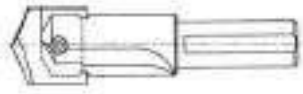
Allied Straight Shank Universal & High Performance Spade Drill Holders

- Straight shank holders are used in non-rotating applications, such as CNC lathes, automatic screw machines, or turret lathes
- For those holders with through-the-tool coolant, connections are made through a tapered pipe tap in the side of the holder body or at the end of the shank-a pipe plug is provided to close off the unused coolant inlet hole



Coolant Fed Straight Shank



Straight Shank without Coolant

†Note: Series D through H high performance spade drill blades require the use of a spade drill adapter.

Allied Taper Shank Universal & High Performance Spade Drill Holders

- Taper shank holders are used in rotating applications, such as boring mills, drill presses, vertical & horizontal machining centers, etc
- For rotating applications with through-the-tool coolant, a rotary coolant area is provided
- Coolant is induced into the holder via an RCA (rotary coolant adapter)

†Note: Series D through H high performance spade drill blades require the use of a spade drill adapter.
Extra long series spade drill holders are available on request

Original T-A drill inserts are an excellent choice for gerneral purpose use. The design provides fast penetration rates that produce good hole size and finish. Standard geometry combines highly efficient and stable cutting action to minimize power consumption. Recommended for use in most steels, cast irons, high temperature alloys and aluminum alloys.
Gen2 T-A is the next generation in replaceable tip drilling systems. Gen2 T-A provides for lower drilling forces with increased drill stability. The geometry allows for smoother breakout on through holes and improved chip formation.
Flat Bottom T-A drills are used as a secondary finishing tool for bottoming and for flat bottom finishing.
MATERIALS:
HSS (CPM-M4) This tool steel grade possesses the highest material toughness to resist shock. It will drill the majority of steels and cast irons in the industry that are below 280 BHN.
Super Cobalt (CPM-T15) This tool steel grade exhibits mid-range wear resistance and toughness. This grade with provide increased wear resistance in any ferrous or non-ferrous application within the 280-359 BHN range.
Premium Cobalt the most wear-resistant tool steel. It is more susceptible to fracture from shock and vibration. It is recommended for hard materials (350-500 BHN) as well as abrasive materials.
COATINGS:
TiN coating provides increased lubricity and heat resistance and allows for increased machining speeds.
TiAlN coating has a higher heat threshold allowing for higher drilling speeds in stainless steels, titanium and nickel-based alloys. Has proven successful in cast iron applications. Not for aluminum.
AM200 proprietary coating has excellent wear characteristics and a high heat threshold. Ideal for most high penetration drilling applications.

Super Cobalt Flat Bottom T-A® Drill Inserts

Solid Carbide T-A® Drill Inserts

- **C5** carbide is for general use in steel applications. It offers exceptionally high wear resistance. High machine tool rigidity is required.
- **C1** carbide is primarily for steel applications. This carbide offers wear characteristics similar to C5 carbide. In addition to its wear characteristics C1 carbide is considerably more durable when compared to other carbide grades.
- **C2** is for use in non-ferrous applications (high temperature alloys, stainless steels, aluminums, cast irons). It offers exceptionally high wear resistance. High machine tool rigidity is required.

C5 carbide is for general use in steel applications. It offers exceptionally high wear resistance. High machine tool rigidity is required.

C1 carbide is primarily for steel applications. This carbide offers wear characteristics similar to C5 carbide. In addition to its wear characteristics C1 carbide is considerably more durable when compared to other carbide grades.

C2 is for use in non-ferrous applications (high temperature alloys, stainless steels, aluminums, cast irons). It offers exceptionally high wear resistance. High machine tool rigidity is required.

Allied T-A® Drill Insert Flanged Shank Holders

Coolant Fed

- Available with a larger body diameter than the standard series, which yields added support for drill inserts and higher inertial strength. This reduces holder failure in high torque applications. Call for pricing.
- T-A® Drill Insert holders are also available in XL and 3XL lengths including metric versions of most sizes. Call for pricing.
- When using the extended, long, XL and 3XL holders without a support bushing, AMEC recommends using a short T-A® holder to establish an initial hole two to three times diameters deep
- Never start or continue rotation of this tool holder without proper engagement with a work piece or fixture. Failure to do so could result in tool failure and/or personal injury.
- Rotary coolant adapters (for taper shank holders) are sold separately.

GEN3SYS™ Coolant Fed Drill Bodies

MADE IN THE USA

Fractional Size

- Holders have a highly precise locating pad which ensures absolute repeatability and reductions in TIR
- Precision ground locating slot
- 1/8 NPT coolant port

Note: all part numbers ending with “C” have round shanks, “F” means shank has flats.

Series - 12

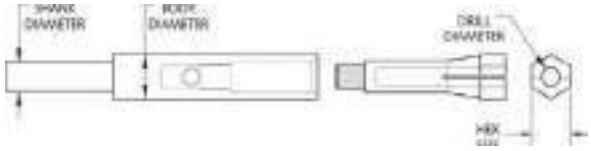
WHITNEY TOOL Collet Type Drill Extension System

Holders for Drill Extension System

- 4” & 9” Extension use collets
- Accommodates 1/16” thru 5/16” drills
- Slim profile gets into places that other collet type extensions cannot accommodate
- Threaded type collets eliminate the need for bulky collet nuts
- It’s easy to change collets, no special wrenches required
- A low cost system for difficult to reach spots



4" O.A.L.
Insert the drill into the end and screw down the compression cap to secure in place.
(Above statement for miniatures only)

WHITNEY TOOL Miniature Drill Extensions

- 1/8” & 3/16” Diameter extensions
- #80 Drill size thru 1/16”
- Slim profile allows you to reach tight places
- The extension gives you added reach for small size drills
- Integral compression collet lets you change drills easily

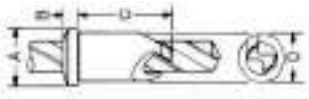
CHAM-BIT®



- Drill, chamfer and deburr in one operation
- Positioning for drill length can be varied instantly
- Patented locking device prevents any axial movement of Cham-Bit
- Single point cutter assures concentricity
- Drill acts as a pilot to reduce chatter
- Easily resharpened on any drill grinder without damage to the drill
- Can provide an additional chamfer diameter to a multi-diameter drill
- 90° Included angle
- Drill bit not included

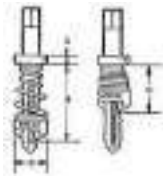
Also available in wire gage, letter and metric sizes

BURR-BIT



- Deburrs the top of the tapped hole while the tap is being withdrawn from the work piece at standard 120°
- No reversal cut in the chamfer due to tool cutting only in reverse
- Creates a chamfer for easy screw insertion; leaves no burr to clog the tapped hole
- Deburrs to consistent depth even though work pieces vary in thickness
- Easy to install; simply slips over your tap
- Resharpenable with simple radial relief grinding fixture
- Taps not included
- Available up to size 1-1/4" and in metric sizes - price on request
- Also available in 90° - price on request

COUNTER-BIT

- Conical pilot supports cutting edge to assure chatter-free cut
- Will not commence cutting until the pilot or work piece has found the center of the previously drilled hole
- Rubber spring provides "pre-load" for constant pressure, thus helping to eliminate chatter
- Concentric countersinks and chamfers assured
- Replaceable high speed steel blades ground with radial relief, assure smooth cut. (tungsten carbide blades special order)
- Available in 60°, 82°, and 90° (120° special order)
- Straight shank (Morse Taper shank special order)

5 Pc. Set of High Speed Steel Deburring Cutters

Front/Rear Cutting

- Deburr the front & rear of a hole in one pass
- Simple to adjust or change blade in machine holder
- One piece durable, solid steel body
- Proven reliability, no springs or plungers
- Fully adjustable to control cutting pressure and chamfer
- Sizes included: 1/8, 5/32, 3/16, 7/32 & 1/4”

Long Series Combination Drill & Countersink

Solid Carbide • 60°

- Long overall length
- Solid carbide construction helps reduce tool changes when centering abrasive or difficult to machine materials
- Designed to maintain accurate center holes on long production runs, or when precise centering is required
- M A Ford List #405

NC Spotting Drills

High Speed Steel • 82°, 90° and 120° • Bright Finish

- Ideal for close tolerance NC spotting operations
- Provides a more accurate and faster spotting location for follow-up drilling
- Eliminates wandering
- Short, regular or long lengths

Solid Carbide Spotting Drills

.3xD Length • 90° & 120°

- 21° Helix
- Designed for accurate spotting on NC machines
- Short lengths and no body clearance make this a very rigid tool
- Can be used at high speeds and feeds, compatible with other carbide tooling
- Easy to repoint because there is no web taper
- M A Ford List #403 & 404

6 Flute Chatterless Countersinks

High Speed Steel

- Designed for economical, general purpose countersinking, chamfering or deburring
- Because of the multiple flute design, chip loads are generally smaller and even at maximum speeds, chatter-free machining is possible
- Steam homogeneous surface treatment (blackening) to prolong tool life and prevent galling
- M A Ford Series #79

CNC-K™ Precision 6 Flute Countersinks — High Speed Steel

- Designed specifically for use in NC, CNC and preset machine tools
- Feature Chatterless™ tooth geometry, using staggered cutting angles to eliminate the cause of harmonic vibration
- Close tolerances on cutting angles, diameters and lengths assure setting accuracy and excellent performance
- May be resharpened many times for ultimate economy

Technical and Programming Information

NOTE: For any depth the countersink diameter expands in a direct ratio. As you travel in the (A) direction along the axis of the countersink (X) expands in a direct relationship to angle (K) (forming an angle with the tangent of X/A)

Since the angle expands on both sides of the frilled hole: you must use 2 times the tangent of the angle for your ratio (R).

Price (K)	Ratio (R) = 2 X/A
32°	1.15
41°	1.74
45°	2.00
50°	2.38
55°	2.86
60°	3.46

Angle (K) Tangent = X/A

Calculations
C = H + RA
A = (C - H)/R
S = (C - D)/R

Example:

.500 hole diameter, countersink to .875 cut diameter with 41° angle (use NCK-1"-41°)

A = .875 - .500 / 1.74 = .216

S = .875 - .203 / 1.74 = .386

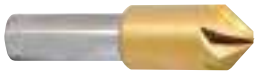
RAPIDKUT 6 Flute Countersinks

M-42 Cobalt • TiN Coated



- Excellent for countersinking abrasive, high-strength, heat resistant, exotic, and other difficult to machine materials
- TiN coated for higher surface hardness and better lubricity
- Coating can also help to enhance productivity and extend tool life

Sunchance 3N1™ Spot, Drill, and Countersink Cutter

High Speed Steel and Carbide

- Conventional thin-web drill point that is blended into two flutes of a four-flute chatter-free countersink…to perform two or all three of the steps in a spot-drill-countersink and edge chamfer operations
- Spot drill, countersink, and edge chamfer
- Double end

Material - High Speed Steel

Sunchance Tube End Forming Cutters

High Speed Steel

- Used to produce a smooth, round lip on all types of tubing, including steel, copper, aluminum, plastic and other materials
- Not recommended for tubing with irregular wall thickness or for interrupted cutting

Sunstance® Carbide Inside Deburring Cutters

Shear Tooth Design

- For general purpose light deburring applications
- Multi-flute design is self piloting
- May be reground many times
- One tool can deburr many different hole diameters
- Large variety of shanks available
- Noses all come to a point
- Furnished in 60° and 90° angles
- The sectional shear-tooth pattern on these cutters is intended for deburring only
- For heavy chamfering, use chatterless countersinks
- 3/32 thru 1/4" are solid carbide and double end, 5/16 thru 1" are solid carbide heads brazed to hardened alloy precision ground shanks and single end

RAPIDKUT® Solid Carbide Chamfer Mills

2 & 4 Flute Single End

- Solid C-2 grade premium sub-micron grain carbide with 10% cobalt
- Center cutting
- Right hand cut
- Diameter tolerance: +.000 / -.002"
- Included angle tolerance: ±1°

Application:

- Eliminates hand deburring operations & provides consistent workpiece finishes

Sunstance® Tube End Chamfering Mills

High Speed Steel

- The cutting teeth are so developed as to preclude chatter and provide ample chip room for every operating condition
- Moderate speeds of about 100 RPM for 1" steel tubing to about 200 RPM for 1/2" tubing are recommended for these cutters - it is advisable to start at a slower speed on any given material or size and increase until best results are obtained
- Designed to chamfer both inside and outside of a tube or pipe simultaneously
- Chatterless
- Designed for heavy chamfering
- Liberal adjustment to accommodate different wall thicknesses

RAPIDKUT® 4 Pc. M-42 Cobalt Chamfering Sets

60°, 82° & 90°

- 8% Cobalt M42 tool steel and solid body combine for rigid tool with an edge that lasts
- Unique geometry allows free cutting and superior finishes
- Includes 1 each 90 x 60°, 90 x 82°, 90 x 90° double end and 90° single end
- Sets supplied in wooden case

Sunchance Outside Deburring Cutters

High Speed Steel

- Shear-type cutting tooth design eliminates burrs on diameters of tubes and rods
- Shearing action cuts clean and reduces chatter
- One tool can handle various size parts
- May be reground many times
- Carbide available-call for pricing
- **Shank required-sold separately-see ad below**

Sunchance Outside Chamfering Mills

High Speed Steel

- Designed to economically chamfer a large variety of diameters on tubing, pipe, and rod
- Chatterless teeth produce heavy chamfers
- One size will accommodate many size parts
- Available in 60° and 90° angles
- May be reground many times
- Shank required-sold separately-see ad below
- These outside chamfering mills are most efficient when used in screw machines, lathes, drill presses, or other chucking machines, or with work holding devices, although where requirements are not too exacting, may be used in a portable power tool on some materials

Sunchance Tube End Deburring Cutters

High Speed Steel

- Economical method of light deburring both inside and outside of tubing simultaneously
- Shear cutting teeth designed to avoid loading
- Adjustable
- Chamfer 30° inside and 45° outside
- Great for production deburring
- Operating speeds range from 50-200 RPM
- May be reground many times
- Two piece inside and outside cutting design consisting of plug and adjustable ring

Straight Shank Capscrew Counterbores

High Speed Steel and M35 Cobalt • TiN Coated

- Designed for fast and easy cutting
- 4 Flute, 30˚ right-hand spiral
- The high lubricity of TiN improves chip flow, resists galling and edge build up
- Ideal for a wide range of applications where improved tool life and elevated feeds and speeds are required

Irwin Unibit® Step Drill Sets

- Easy-to-sharpen non-skid tip eliminates the need for center punching and gives sure starts even on curved surface
- Single-fluted cutting edge
- Helps assure true round holes and allows greater control
- As many as 13 different hole sizes in a single bit eliminates the need for a toolbox full of drill bits
- Industrial grade high speed steel heat treated to assure maximum durability
- 3 Flatted shank
- Prevents slipping in drill chucks

Set Range	Set Material	Order No.	Price

PROCUT Expansion Chucking Reamers

HIgh Speed Steel • Screw Adjustment Type

- Not designed to allow for reaming over or under size holes — expansion feature to permit resharpening after becoming worn
- See catalog index for adjustable blade reamers which allow reaming under or over size holes.
- Straight shank diameter - same as regular reamers

PRIDUT Taper Pin Reamers

High Speed Steel

- For reaming tapered holes that receive standard taper pins
- Reamers have a taper of 1/4" per foot
- The point of each reamer will enter hole reamed by next smaller size
- **Straight flute** is designed for hand use in easier to ream materials
- **Spiral flute** with left hand spiral for hand use in harder to ream materials
- **Helical flute** built for machine reaming of pin holes on a production basis, prevents chips from packing in flutes and reduces breakage; free cutting action at high speeds produces a fine finish

Construction Taper Reamers

High Speed Steel • Left Hand Spiral
Fast Helix, 1-1/2" Shank Length

- Fast helix for better hole finish
- Generous taper for ease in hole entry
- One inch long full reamer diameter
- Backtaper from full reamer diameter eliminates hole binding
- Safety stop flange prevents tool run through

Carbide Tipped Chucking Reamers

Straight Shanks STD & Flute Full Length for Steel

Taper Shank

- Carbide tips brazed to one-piece hardened tool steel bodies
- Cutting diameter tolerance +.0003" -.0000"
- For general reaming of steel, cast iron, non-ferrous metals, plastics and non-metals
- Reamers for steel have a special cutting geometry; positive radial rake (behind center) narrow circular lands; minimum back taper & longer flutes for straighter holes

Carbide Tipped Expansion Chucking Reamers

Straight Shank or Taper Shank

- Recommended for reaming abrasive materials
- As the diameter wears down, the reamers can be expanded many times by tightening the end adjusting screw and regrinding to its original size

NOTE: Expansion reamers should not be expanded to use at diameters larger than listed diameters nor be considered as adjustable for use in producing holes of several sizes and the expansion screw should never be loosened

TrueSize® Solid Carbide Chucking Reamers

- Solid carbide reamers can be used successfully in a broad range of ferrous metals
- In hardened steel Rc 40 or greater, solid carbide reamers are the only realistic choice
- Recommended for general purpose reaming in most materials
- Tolerances:
  3/8" and smaller +.0001" / +.0003"
  over 3/8" +.0001" / +.0004"
- Right hand cutting with straight flutes and a 45° lead cutting angle
- Well suited for ferrous metals, and for many nonferrous and nonmetallic materials
- Sizes up to .253" are 4 flute
  Sizes over .253" are 6 flute
- M.A. Ford List #272

FULLERTON Straight Shank Straight Flute Chucking Reamers

Series 1400 • Solid Carbide

- Male centers on items up to .1124 (2.86mm)
- Female centers on items over .1124 (2.86mm)
- Cutter diameter tolerance: up to .2500 +.0002/-.0000; over .2501 +.0003/-.0000
- Shank diameter tolerance: +.0005/-.0005 (+0.013mm/-0.013mm)
- 45 Degree lead angle

General Purpose Hand Taps

Fractional Sizes • Straight Flute • Ground Thread • High Speed Steel

- Optional tolerances available while supplies last
- Standard tolerances in stock for immediate delivery
- TiN coating available on all taps

RAPIDKUT™
- Manufactured in USA
- Consistent high quality threads
- General & production applications
- Premium steel ~ maximum tap life

PRO CUT™
- Made to strict ASA specifications, quality and economy

RAPIDKUT 3 Pc. Tap Sets

High Speed Steel • Bright Finish

- Set includes one each: taper, plug and bottoming taps
- Ground threads, 4-flute
- For both ferrous and non-ferrous materials
- Used in all types of hand or machine tool operations
- **Buy a set & save**

DORMER 4 Flute Straight Shank Taps

- TiAlN top coating
- Excellent performance when threading both through and blind holes in short chipping materials
- Internal coolant with axial outlet - Reduces interruptions of the production process by providing optimum chip evacuation in both horizontal and vertical blind hole machining

HSS MORSE GP Cleanout Taps

Fractional, Machine Screw & Metric • High Speed Steel • Plug Chamfer

- Cleanout taps are used exclusively to restore existing internal threads by removing dirt, old finishes, burrs, and debris
- Cleanout taps are used by hand, hand held driver, drill press, or machine to restore threaded holes. When used by machine, a holder with axial float should be used, allowing the tap to time itself to existing threads.
- Pitch diameter tolerance is H0 for all machine screw and fractional threads and D0 for all metric threads
- Morse List # 2146

TiN Coated Plug Taps

TiN Coating

- Produces an extremely hard coating on tool surface
- Offers outstanding wear resistance, reduces friction and prevents galling
- Greatly increases tool life
- Increased lubricity and chip flow provide better surface finish and reduced torque
- Allows for increased speed & feeds to improve productivity

RAPIDKUT™

- Manufactured in the USA
- Consistent high quality threads
- General & high tech applications
- Premium steel
- Maximum tap life

Self Aligning Tapping Fixture

- Tap wrench is aligned in a slip fit steel guide which automatically squares the tap or reamer with the workpiece
- Round as well as flat parts are accurately accepted
- Tap wrench portion has jaw capacity up to 1/2”
- Delivered complete with 2 sets of jaws (one for up to 1/4” taps and another for 1/4” to 1/2” taps)

2 Pc. Tap Guide Set

Consists of (1) EV52221 and (1) EV52223

Order No.	Price
EV52225	Price

Tap Guide

- 1/2 Diameter hardened shank
- 3/16 Diameter hardened tension pin
- Adjustable tension spring
- Reversible tension pin for male and female hole centering
- With this tool you start every tap straight

Order No.	Price
EV52221	Price

Machine Tapping Guide

- Provides sensitive feel for hand tapping small holes on milling machines, drilling presses, and lathes
- Starts every hole straight and prevents tap breakage
- Shank diameter is 3/8; handle diameter is 1”
- #0 to #12 tap capacity

Order No.	Price
EV52223	Price

Micro Tap Guide

- Adjustable spring tensioned 1/2” body, knurled for easy handling
- Both male and female. just reverse the point and you have a center hole for small taps
- A handy accessory for any machinist’s box

Order No.	Price

General Purpose Spiral Point Taps

- Plug & bottoming style
- Ground thread
- High speed steel
- Morse List #2070 (machine screw sizes) 2047 (fractional)
- OSG List #105B (bottoming), 105 (plug)

TiN Coated Spiral Point Plug Taps

TiN Coating
- Produces an extremely hard coating on tool surface
- Offers outstanding wear resistance, reduces friction and prevents galling
- Greatly increases tool life
- Increased lubricity and chip flow provide better surface finish and reduced torque
- Allows for increased speed & feeds to improve productivity

RAPIDKUT™
- Manufactured in the USA
- Consistent high quality threads
- General & high tech applications
- Premium steel
- Maximum tap life

General Purpose Spiral Fluted Taps

High Speed Steel • Bright Finish

- Recommended for tapping relatively deep blind holes in materials which produce long curling chips
- The higher flute helix angle increases the lifting action in ejecting chips through the open end of the hole and affords increased ability to span slots or other interruptions
- OSG List #107 (inch) List #143 (metric)

PRECISION BRAND Hot Melt Coating

- Strippable protective coating protects tools, gauges, and metal parts from nicks, corrosion, and abrasions during storage and shipping
- Packaged in convenient 5 lb. bags
- Easy to use — coating is presliced into manageable pieces
- Poly bag packaging means easy handling and storage
- Set time is less than 60 seconds
- To remove, coating peels right off
- Melting temperature: Type 1= 340-350°F

PRODUIT Spiral Fluted Taps

High Speed Steel • Ground Thread

- **Fast Spiral 45°**
- **Slow Spiral 30°**
- Recommended for use in ductile materials such as brass, copper, aluminum, magnesium and die cast materials
- Excellent for tapping blind holes where chips are a problem
- These taps propel chips upward, out and away thus producing finer thread quality
- Spiral flutes will also bridge a keyway or other gap in the hole
- **Sizes 4, 5, & 6 are 2 flute - all other sizes are 3 flute**

RAPIDKUT® Combined Drills & Taps

High Speed Steel

- Drills and taps in one operation
- Can be used on multi-spindle operations
- 118° Self centering helical point eliminates the need for center punch or center drilling

Blue Ring – High Vanadium Steel
For general purpose machining of:
- Low carbon steel (< HRc 16)<ParaStyle:Bullets>Medium to high carbon steel and low alloy steel (>HRc 23)
- Steel castings and forgings (> HRc 24)

Yellow Ring – High Vanadium Steel
For tough materials such as:
- Stainless steel (>HRc 23)
- Heat/corrosion resistant stainless steel (>HRc 24)
- Valve stainless steel (>HRc 38)
- Alloyed high carbon and tool steel

Red Ring – Powder Metallurgy HSS
For high tensile materials such as:
- Titanium (>HRc 38)
- Inconel, Waspaloy, Hastelloy and Monel (>HRc 38)
- Tool steels and nickel alloys
- High strength stainless steels
- Aluminum alloy castings

			General Purpose - Blue Band				Tough Material - Yellow Band				High Tensile - Red Band

Black Ring - High Vanadium Steel
For multi-purpose use in a wide variety of materials such as:
- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

Green Ring – High Vanadium Steel
For all types of aluminum such as:
- Pure aluminum
- Aluminum alloys

RAPIDKUT® Metric High Performance Spiral Point Taps

Bright Finish • Plug Style
Color Coded for Easy Identification

Blue Ring – High Vanadium Steel
For general purpose machining of:
- Low carbon steel (< HRc 16)<ParaStyle:Bullets>Medium to high carbon steel and low alloy steel (>HRc 23)
- Steel castings and forgings (> HRc 24)

Yellow Ring – High Vanadium Steel
For tough materials such as:
- Stainless steel (>HRc 23)
- Heat/corrosion resistant stainless steel (>HRc 24)
- Valve stainless steel (>HRc 38)
- Alloyed high carbon and tool steel

Black Ring - High Vanadium Steel
For multi-purpose use in a wide variety of materials such as:
- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

Red Ring – Powder Metallurgy HSS
For high tensile materials such as:
- Titanium (>HRc 38)
- Inconel, Waspaloy, Hastelloy and Monel (>HRc 38)
- Tool steels and nickel alloys
- High strength stainless steels

RAPIDKUT® High Performance Spiral Flute Taps

Bright Finish • Semi-Bottoming Style
Color Coded for Easy Identification

Blue Ring – High Vanadium Steel
For general purpose machining of:
- Low carbon steel (< HRc 16)<ParaStyle:Bullets>Medium to high carbon steel and low alloy steel (>HRc 23)
- Steel castings and forgings (> HRc 24)

Yellow Ring – High Vanadium Steel
For tough materials such as:
- Stainless steel (>HRc 23)
- Heat/corrosion resistant stainless steel (>HRc 24)
- Valve stainless steel (>HRc 38)
- Alloyed high carbon and tool steel

Red Ring – Powder Metallurgy HSS
For high tensile materials such as:
- Titanium (>HRc 38)
- Inconel, Waspaloy, Hastelloy and Monel (>HRc 38)
- Tool steels and nickel alloys
- High strength stainless steels

Black Ring - High Vanadium Steel
For multi-purpose use in a wide variety of materials such as:

- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

Green Ring – High Vanadium Steel
For all types of aluminum such as:

- Pure aluminum
- Aluminum alloys
- Aluminum alloy castings

			Multi-Purpose - Black Band				Aluminum - Green Band

RAPIDKUT® Metric High Performance Spiral Flute Taps

Bright Finish • Semi-Bottoming Style
Color Coded for Easy Identification

Blue Ring – High Vanadium Steel
For general purpose machining of:
- Low carbon steel (< HRc 16)<ParaStyle:Bullets>Medium to high carbon steel and low alloy steel (>HRc 23)
- Steel castings and forgings (> HRc 24)

Yellow Ring – High Vanadium Steel
For tough materials such as:
- Stainless steel (>HRc 23)
- Heat/corrosion resistant stainless steel (>HRc 24)
- Valve stainless steel (>HRc 38)
- Alloyed high carbon and tool steel

Red Ring – Powder Metallurgy HSS
For high tensile materials such as:
- Titanium (>HRc 38)
- Inconel, Waspaloy, Hastelloy and Monel (>HRc 38)
- Tool steels and nickel alloys
- High strength stainless steels

Black Ring - High Vanadium Steel
For multi-purpose use in a wide variety of materials such as:
- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

DORMER Spiral Flute Shark Taps

Blue Ring - For Stainless Steel
- Super-B TiAlN + WC/C coating with an additional edge treament
- 40° angle for blind holes

Yellow Ring - For Structural, Plain Carbon & Low Alloy Steels
- TiAlN - Top coating with an additional edge treatment
- 45° angle for blind holes
- Prevents nest formation of chips, reducing the risk of re-cutting chips on reversal

Red Ring - For Alloy Steels
- TiAlN - Top coating with an additional edge treatment
- 45° angle for blind holes
- Prevents nest formation of chips, reducing the risk of re-cutting chips on reversal
- Back tapered reducing chipping on the last threads of the taps and also reducing torque when the tap reverses

RAPIDKUT® High Performance Spiral Point Taps

Steam Oxide • Plug Style • Color Coded for Easy Indentification

Blue Band - for General Ductile Materials
Designed for high speed tapping applications. Developed to withstand the high stress and high heat associated with high speed CNC production tapping.
- Used in general machine tapping applications for mild carbon steels such as 1018, 1010, 1035, 1045, 1050 and 1065
- Up to 25 HRC

Red Band-for High Tensile Materials
Powdered metal taps offer superior toughness, lubricity and are made of super hard powder high speed steel.
- Used for heat resistant materials, high strength stainless stel and titanium alloys as well as other high tensile steels and alloys including tool steel and nickel alloys
- Up to 48 HRC

Yellow Band -for Tough Materials
Designed for high speed tapping applications. Developed to withstand the high stress and high heat associated with high speed CNC production tapping.
- Superior performance in hardened tool steels such as 4140, 4340, H13, D2, and a new variety of stainless steels
- Up to 35HRC

			General Purpose - Blue Band				High Tensile - Red Band				Tough Material - Yellow Band

RAPIDKUT® High Performance Spiral Flute Taps

Steam Oxide • Semi-Bottoming • Color Coded for Easy Indentification

Blue Band - for General Ductile Materials
Designed for high speed tapping applications. Developed to withstand the high stress and high heat associated with high speed CNC production tapping.

- Used in general machine tapping applications for mild carbon steels such as 1018, 1010, 1035, 1045, 1050 and 1065
- Up to 25 HRC

Red Band - for High Tensile Materials
Powdered Metal taps offer superior toughness, lubricity and are made of super hard powder high speed steel.

- Used for heat resistant materials, high strength stainless steel and titanium alloys as well as other high tensil steels and alloys including tool steel and nickel alloys
- Up to 48 HRC

Yellow Band - for Tough Materials
Designed for high speed tapping applications. Developed to withstand the high stress and high heat associated with high speed CNC production tapping.

- Superior performance in hardened tool steels such as 4140, 4340, H13, D2, and a new variety of stainless steels
- Up to 35 HRC

			General Purpose - Blue Band				High Tensile - Red Band				Tough Material - Yellow Band

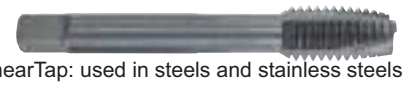
High Performance Taps

Spiral Point Plug Style Taps



ShearTap: used in steels and stainless steels up to 35Rc, 1010, 1018, 1046, 302, 303, 304, 310, 316

HPT for exotic alloys: used in exotic alloys, titanium, and nickel based alloys, monel, inconel

HPT for aluminum: recommended for all types of aluminum alloys

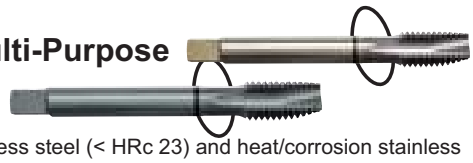
RAPIDKUT High Performance Spiral Pointed Taps for Multi-Purpose



Steam Oxide or TiCN • Plug Style • Color Coded for Easy Identification

- DIN length ANSI shank

Black Ring - High Vanadium Steel

For multi-purpose use in a wide variety of materials such as:

- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

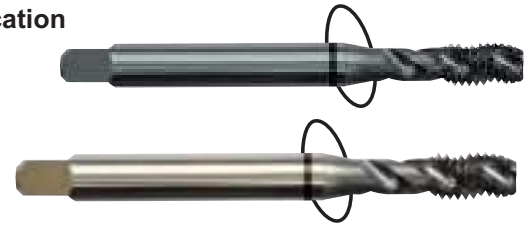
RAPIDKUT Metric High Performance Spiral Flute Taps for Multi-Purpose

Steam Oxide or TiCN • Semi-Bottoming • Color Coded for Easy Identification



- DIN length ANSI shank

Black Ring - High Vanadium Steel

For multi-purpose use in a wide variety of materials such as:

- Low carbon steel (>HRc 16)
- Medium to high carbon steel (>HRc 23)
- Free machining stainless steel (< HRc 23) and heat/corrosion stainless steel (>HRc 24)
- Stainless steel castings (> 38HRc)
- Aluminum, aluminum alloys, cast iron, copper and brass

ONYX CNC Style Spiral Flute Taps

High Speed Steel • Semi-Bottoming • Steam Oxide or Bright Finish

- **Steam Oxide over Nitride** - increases wear resistance, reduces friction, reduces galling and chip welding, improves chip flow and increases tap lubricant retention - not recommended for non-ferrous materials
- **Bright Finish** for tapping a wide range of materials including non-ferrous materials
- For tapping a wide range of materials up to 28Rc hardness
- **CNC Reduced Neck Design and Shorter Thread Length -** for increased coolant flow to the cutting edge, enhanced chip evacuation and reduced contact between tap and workpiece
- Morse List # 2102

High Performance Taps

Spiral Flute Modified Bottoming Style 48° Helix Angle

ShearTap - Used in steels and stainless steels up to 35Rc, 1010, 1018, 1046, 302, 303, 304, 310, 316

HPT for exotic alloys - used in exotic alloys, titanium, and nickel based alloys, monel, inconel

HPT for aluminum - recommended for all types of aluminum alloys

Note: sizes available through 2-4-1/2. TiN coating also available.

High Performance Taps

Metric Spiral Flute Modified Bottoming Taps

Surface treated ShearTap - used in steels and stainless steels up to 35Rc, 1010, 1018, 1046, 302, 303, 304, 310, 316

TiCN-HPT Spiral point for exotic Alloys - used in exotic alloys titanium, and nickel based alloys monel, inconel

CrN-HPT for aluminum: - recommended for all types of aluminum alloys

SHEARTAP™ Cutting Speeds

MATERIAL	HARDNESS BHN	EXAMPLES	SFM*
Carbon Steel	200	1010, 1018	40–65
	200–300	1046, 1050	30–50
Stainless Steel	300	302, 303, 304, 310, 316	15–25
	300	405, 409	15–25
	300	440, 403	15–25

SPEEDS shown are suggested starting points only and may be increased or decreased depending on actual material and machining conditions. Start conservatively and increase until the machining cycle is optimized.

SPEEDS may be increased for coated taps, spiral point taps, fine pitch taps and when the percentage of thread is decreased.

SPEEDS may need to be reduced for spiral flute taps, coarse pitch taps, bottoming taps, difficult materials, longer thread lengths and when the percentage of thread is increased.

EXOTAP® A-TAP® Spiral Pointed Taps

VC10 • Plug Style

- Sharp cutting edge stabilizes chip shape
- Variable helix accelerates chip evacuation
- OSG's V coating for long tool life
- Good for carbon steels, alloy steels, 300 and 400 series stainless steels
- OSG List #16515

EXOTAP® VC-10 Spiral Fluted Taps

TiCN Coated

- Specially designed for difficult-to-machine materials
- Works best with alloy steels, stainless steel 17-4 PH, hardened steels up to 35HrC, die steels, titanium, inconel, stainless steel 400, hardened steel 35-45HrC
- Available in bottoming and modified bottoming
- OSG List #313

ONYX MORSE TAP ONYX Metric Spiral Pointed Plug Taps

CNC Style • Steam Oxide or Bright Finish

- **Steam Oxide over Nitride** - increases wear resistance, reduces friction, reduces galling and chip welding, improves chip flow and increases tap lubricant retention - Not recommended for non-ferrous materials
- **Bright Finish** - for tapping a wide range of materials, including non-ferrouos materials
- For tapping a wide range of materials up to 28Rc hardness
- **CNC Reduced Neck Design and Shorter Thread Length -** for increased coolant flow to the cutting edge, enhanced chip evacuation and reduced contact between tap and workpiece
- Morse List # 2101M

ONYX Spiral Pointed Plug Taps

CNC Style • Steam Oxide or Bright Finish

- **Steam Oxide over Nitride** - increases wear resistance, reduces friction, reduces galling and chip welding, improves chip flow and increases tap lubricant retention - not recommended for non-ferrous materials
- **Bright Finish** for tapping a wide range of materials including non-ferrous materials
- For tapping a wide range of materials up to 28Rc hardness
- **CNC Reduced Neck Design and Shorter Thread Length -** for increased coolant flow to the cutting edge, enhanced chip evacuation and reduced contact between tap and workpiece
- Morse List # 2101M

HY-PRO® -VXL Spiral Fluted Taps

Steam Oxide Finish

- Premium vanadium high speed steel
- For vertical applications
- DIN overall length
- Modified bottom chamfer
- Recommended for cast iron, carbon steels, alloy steels and hardened steels up to 35 HrC
- OSG List #13015

HY-PRO® SEVEN Spiral Point Plug Taps

Bright Finish

- 2B & 3B Class of fit
- Designed for tapping aluminum, mild steels and medium carbon steels
- Short thread geometry

- Results in highest fast speed tapping & max tool life
- OSG List #288

EXOTAP® VC-10TI Spiral Point and Spiral Flute Taps

TiCN Coated

- High performance taps for titanium alloys
- VC-10 premium powdered high speed steel
- Designed for use in titanium alloys and nickel based alloys such as inconel and hastelloy

- Hardened steels up to 42 HrC
- OSG List #313Ti (spiral fluted)
- OSG List #312Ti (spiral pointed)

EXOTAP® VC-10® Spiral Pointed Plug Style

TiCN Coated

- EXOTAP® VC-10® is the premium solution for unsurpassed performance in difficult to maching materials
- Designed for alloy steels, stainless steel 17-4PH, hardened steel up to 35 HrC, die steels, titanium, high nickel alloy, stainless steel 400, hardened steels up to 35-45HrC
- OSG List 312

EXOTAP® VC-10 Spiral Fluted Taps

- Specially designed for difficult-to-machine materials
- Powdered metal with steam oxide finish
- Works best with 400, 17-4 PH stainless steels and hardened steels up to 45HrC
- Available in bottoming and modified bottoming
- OSG List #313

† Reduced shank (shank diameter is smaller than minor diameter)

Helical Flute Thread Mills - NPT, NPTF, Pipe Threads

- AlTiN coated
- Helical flute design for reduced cutting forces, smoother cuts, longest tool life, and maximum thread milling performance
- 100% thread form; superior threads vs. tapping
- Cuts right hand and left hand high quality threads
- Internal and external threads
- Suitable for all types of materials, including heat treated and difficult to machine workpieces

MICRO 100 Helical Flute Thread Mills

- Completely CNC ground
- Helical flute design for reduced cutting forces, smoother cuts, longest tool life, and maximum thread milling performance
- 100% Thread form; superior threads vs. tapping
- Cuts right hand and left hand high quality threads
- Suitable for all types of materials, including heat treated and difficult to machine workpieces
- Supplied with AlTiN coating, uncoated thread mills are also available

Tolerances:
- Shank diameter: -.0001 to -.0003”
- Cutter diameter: ±.0005”
- Length of cut: +.050 to .000”
- Overall length: ±.015”
- TIR maximum: .0005”

MICRO 100 Precision ID & OD Thread Mills

Solid Carbide

- Engineered for milling precision ID and OD threads in all types of steels, non-ferrous metal and exotic materials
- Equally effective in laminated plastics, fiberglass, and composites
- Thread form generated in American Standard thread
- Minimum pitch listed is for an internal thread
- Solid carbide cutter head brazed to solid carbide shank for maximum rigidity

Carmex Precision Tools Ltd. Solid Carbide 3-in-1 Drill

Thread, Chamfer

- TiAlN coating
- Cancels the need for drilling the hole
- Good for both blind and through holes
- Short cycle time and high performance reduces machining costs

PROCUT 15 Pc. Carbon Steel Tap & Die Set

#4 thru #12
13/16" Adjustable Round Dies

- In hinged cover box
- Includes one each plug tap and 13/16" OD adjustable round die for the following 6 thread sizes plus tools indicated:
- **Thread sizes:** 4-40, 6-32, 8-32, 10-24, 10-32, 12-24
- **Threading tools:** plain die stock, T-handle tap wrench, straight tap wrench

Set Material	Order No.	Price
Carbon Steel	**ET51C613**	Price

PROCUT 39 Pc. Tap & Die Sets

#4 thru 1/2"
1" Adjustable Round Dies

- Self-hinged durable plastic case with removable tray
- Includes one each plug tap and 1" OD die for the following 17 thread sizes plus tools indicated
- **Thread sizes:** 4-40, 6-32, 8-32, 10-24, 10-32, 12-24, 1/4-20, 1/4-28, 5/16-18, 5/16-24, 3/8-16, 3/8-24, 7/16-14, 7/16-20, 1/2-13, 1/2-20, 1/8-27 NPT (pipe die is solid round)
- **Threading tools:** T-handle tap wrench, straight tap wrenches, die stock

Set Material	Order No.	Price
Carbon Steel	**ET51C614**	Price
High Speed Steel	**ET51HS614**	Price

PROCUT 41 Pc. Tap & Die Sets

1/4" thru 3/4" NC & NF
1-1/2" Adjustable Round Dies

- Complete set in self-hinged durable plastic case 20" x 12" x 2-1/4"
- Includes one each plug tap and 1-1/2" OD adjustable round die for each of the following 18 thread sizes plus tools indicated:
- **Thread sizes:** 1/4-20, 1/4-28, 5/16-18, 5/16-24, 3/8-16, 3/8-24, 7/16-14, 7/16-20, 1/2-13, 1/2-20, 9/16-12, 9/16-18, 5/8-11, 5/8-18, 3/4-10, 3/4-16, 1/8-27 NPT, 1/4-18 NPT (pipe dies are solid round)
- **Threading tools:** Adjustable die stock, adjustable handle tap wrench, T-handle tap wrench, screw pitch gauge & screwdriver

Set Material	Order No.	Price
Carbon Steel	**ET51C3465**	Price
High Speed Steel	**ET51HS3465**	Price

IRWIN HANSON 41 Pc. Carbon Steel Tap & Hex Die Set

#4 thru 1/2"

- Packed in a hinged durable plastic case with removable tray
- Contains one each of the following taps and hex dies:
- **Thread sizes:** 4-40, 6-32, 8-32, 10-24, 10-32, 12-24, 1/4-20, 1/4-28, 5/16-18, 5/16-24, 3/8-16, 3/8-24, 7/16-14, 7/16-20, 1/2-13, 1/2-20, 1/8-27 NPT
- **Threading tools:** 2 die stocks, tap handles, tap wrench, 1 screwdriver, 1 thread gage

Set Material	Order No.	Price
Carbon Steel	**EW5124606**	Price

PROCUT 64 Pc. Tap & Die Sets

#4 thru 1", 1", 1-1/2", 2" Adjustable Round Dies

- In self-hinged durable plastic case with tray
- Complete set includes one each plug tap and die for the following 28 thread sizes plus tools indicated:
- **Thread sizes:** 1" Adjustable round dies: 4-40, 8-32, 10-32, 1/4-20, 5/16-18, 3/8-16, 7/16-14, 1/2-13, 1/8-27 NPT, 6-32, 10-24, 12-24, 1/4-28, 5/16-24, 3/8-24, 7/16-20, 1/2-20
- **Thread sizes:** 1-1/2" Adjustable round dies: 9/16-12, 5/8-11, 3/4-10, 9/16-18, 5/8-18, 3/4-16, 1/4-18 NPT pipe die is solid round
- **Thread sizes:** 2" Adjustable round dies: 7/8-9, 7/8-14, 1-8, 1-14
- **Threading tools:** 1" Adjustable die stock, 1-1/2" adjustable die stock, 2" adjustable die stock, 2" adjustable handle, tap wrenches, T-handle tap wrench, screw pitch gauge, screwdriver

IRWIN HANSON 75 Pc. Super Tap & Die Combination Set

Modular case system

- Individual modular sets of SAE taps, SAE dies, metric taps, metric dies, drive tools
- Slim design fits in smallest tool drawers

Set includes:

- Plain die stock for 5/8" hex dies
- Adjustable die stock for 1" hex dies
- Adjustable tap wrench for taps #0 to 1/2"
- Two-in-one tap wrench 1/4" to 1/2"
- T-handle tap wrench 1/4" to 1/2"
- 16 Leaf fractional thread pitch gage
- 16 Leaf metric thread pitch gage
- **Thread size -machine screw:** 4-40, 6-32, 8-32, 10-24, 10-32, 12-24
- **Fractional:** 1/4-20, 1/4-28, 5/16-18, 5/16-24, 3/8-16, 3/8-24, 7/16-14, 7/16-20, 1/2-13, 1/2-20
- **Metric:** M3x0.50, M4x0.70, M4x0.75, M5x0.80, M5x0.90, M6x1.00, M7x1.00, M8x1.00, M8x1.25, M9x1.00, M9x1.25, M10x1.25, M10x1.50, M11x1.50, M12x1.50, M12x1.75
- **Pipe sizes:** 1/8-27 NPT, 1/8-28 BSP

Set Includes	Order No.	Price
Carbon Aligning Hex Die and Plug Style Taps	EW5126376	Price

Nu-Thread Thread Restoring Files

- Overlap a few good threads & use just like a file to restore damaged areas
- 7/16" Square x 8-1/2" overall length

For Use With - Bolts		
Repairs (TPI)	Order No.	Price
.80, 1.00, 1.25, 1.50, 1.75, 2.00, 2.50, & 3.00mm	FB808M	Price

PROFIT 2 Flute Hi-Helix End Mills for Aluminum

High Speed Steel

- Designed to cut aluminum and other non-ferrous materials
- The 38° helix shears the material cleanly and allows for more of the cutting flutes to be engaged with the workpieces thus eliminating chatter

RAPIDKUT®

Made by leading USA end mill manufacturers. Quality made to meet the close tolerances required in today's high production environment.

Rapidkut: 1/32″ - 3″ In all the styles and types required by the most precision CNC machines. Equal in quality to other premier American end mill manufacturers but at a substantial savings.

PRO CUT II PREMIUM CUTTING TOOLS

Premium quality end mills from selected Global Manufacturers. Designed to meet the need of higher production runs at affordable prices.

Pro Cut II: Manufactured to strict USA specifications. These mills are in use throughout the United States in many of the finest precision shops. Important price savings without sacrificing quality. Huge inventory and immediate delivery.

PROCUT

Produced by World Quality manufacturers. Designed to give you excellent quality at affordable prices.

ProCut: Imported to provide a full line of general purpose economy priced end mills that will produce excellent results at very reduced costs.

High Speed Steel Center Cutting TiN Coated End Mills

- TiN coating increases surface hardness and protects the tool from abrasive wear to increase tool life
- Facilitates chip flow, resists galling and reduces heat generated in the metal removal process
- Allows for elevated feeds and speeds to increase your productivity

TiN Coated 2-Flute Single End

RAPIDKUT® 3-Flute M-42 8% Cobalt Shearkut Spiral Single End Mills

60° High Spiral Design Cuts Cleanly & Efficiently

- Excellent resistance to heat and abrasion
- Improved machining in exotic materials — titanium, inconels, stainless steel, mold and die steels
- Excellent finishes due to less vibration
- Precision ground to CNC tolerances
- 200% to 500% more cutting power

M-42 Cobalt — Coarse Tooth Center Cutting Roughing End Mills

- For general purpose milling of soft to medium hard materials
- Suitable for heavier feed rates
- TiN coating improves tool life and allows elevated feeds and speeds
- TiCN coating is ideal for cutting extremely abrasive or difficult to cut materials

Length - Standard

M-42 Cobalt Roughing and Finishing End Mills

Rough and Finish in a Single Pass!

- Reduce chatter dramatically
- For maximum performance, reduce feeds by 10%
- Easy regrinding, longer tool life, less tool deflection
- TiN coating improves tool life and allows elevated feeds and speeds
- TiCN coating is ideal for cutting extremely abrasive or difficult to cut materials

HSS MORSE M PM M-42 8% Cobalt Coarse & Fine Tooth Roughing End Mills

Roughing end mills feature a chip breaker type cutting edge for heavier cuts, high speeds and feeds and greatly increased productivity

Coarse Tooth Center Cutting 30° Helix:

- Recommended for a wide variety of materials of soft and medium hardness including titantion and aluminum alloys

TiN Coating:

- TiN coating allows increased feeds over uncoated end mills
- Improves chip flow, resists galling and edge build up and reduces heat generated in the metal removal process
- Ideal for a wide range of applications where improved tool life and elevated feeds and speeds are required

Fine Tooth Center Cutting 30° Helix:

- Recommended for difficult to machine, high tensile strength, abrasive and harder materials up to 40 Rc

TiCN Coating:

- TiCN coating has the same lubricity as TiN but is more than 30% harder. This makes it the optimum choice for maximizing tool life in production runs
- Ideal for operating at aggressive feeds and speeds and for cutting extremely abrasive and difficult-to-cut materials

Coarse Tooth

M-42 Cobalt — Fine Tooth Roughing End Mills

- For high production milling in difficult to machine materials such as iconel, hastalloy, titanium alloys and other materials up to 40 Rc.
- The pressure of the cut is distributed over many teeth
- Less friction
- Breakage and cracks are eliminated
- TiN coating improves tool life and allows elevated feeds and speeds
- TiCN coating is ideal for cutting extremely abrasive or difficult to cut materials

Style - Stub

3 Flute Fine Tooth Roughing End Mills

M-42 Cobalt • Center Cutting • 45° Helix

- Use for milling operations in hard materials
- 3-flute design and high shear angle aids in chip removal and produces better finishes than coarse tooth design
- TiN coating improves tool life and allows elevated speeds and feeds

3-Flute Roughing End Mills for Aluminum

M-42 Cobalt

- For rapid stock removal in aluminum and other alloys
- The three flute design improves chip flow and prevents flutes from loading up
- TiN coating improves tool life and allows elevated feeds and speeds
- TiCN coating is ideal for cutting extremely abrasive or difficult to cut materials

Length - Standard

PROCUT M-2 and M2-AL Roughing End Mills - Stub Length

M-2 High Speed Steel • M-2-AL Premium High Speed Steel with Aluminum Content

- Stub length
- 3/4" Shank
- 1-1/8" Flute length
- 3-5/8" Overall length
- All sizes 6 flutes
- Aluminum alloy helps increase tool life by reducing friction
- For high speed & feed rates

SOLID MORSE MASTER Solid Carbide 2 Flute Single End Mills

- Recommended for easily machined materials including low alloy steels, non-ferrous materials, and cast iron
- Ideal for plunge cutting or slotting
- Morse list #5944 (regular) 5954 (long) and 5950 (extra long)

truCORE® E12 Solid Carbide 2 Flute Square End Mills

Square End or Ball End

- A versatile general purpose tool for slotting and peripheral milling
- Fine grain carbide for greater toughness, wear resistance, and higher transverse rupture strength
- Precision ground for reliability and outstanding performance
- Coatings for a wide range of applications
- 30° Helix, round shank

MADE IN THE USA

K Good in Cast Iron
M Good in Stainless Steels
P Good in Carbon and Tool Steels
N Good in Non-ferrous

RAPIDKUT® 2 Flute Solid Carbide Long Reach End Mills

Reduced Neck • Square End

- Neck diameter reduced for clearance
- Neck reduction .020" - all sizes
- The solid neck area provides reach with maximum rigidity
- Used to mill deep pockets or slots where long flute lengths are not needed
- Made from premium submicron grain carbide
- Tolerances +.000/-.002"
- 30° Helix

					Uncoated		TiN		TiCN		AlTiN

TuffCut® GP 2 Flute Ball Nose Carbide End Mills

- Stub length
- 30° Helix
- Straight shank
- Designed for aggressive milling of most materials with reduced deflection and improved tool life and overall economy
- M.A. Ford List #166

				Uncoated		ALtima

TuffCut® GP 2 Flute Ball Nose Carbide End Mills

Standard Length • 30° Helix

- Manufactured with a full ball radius end
- Designed for milling fillets or similar rounded corners in the bottom of a cut
- Ideal for most ferrous metal applications
- M.A. Ford List #150

				Uncoated		ALtima

truCORE® E12B Solid Carbide 2 Flute Ball Nose End Mills

MADE IN THE USA

- Precision ground for reliability and outstanding performance
- Fine grain carbide for greater toughness, wear resistance, and higher transverse rupture strength
- Round shank, 30° Helix

K Good in Cast Iron
M Good in Stainless Steels
P Good in Carbon and Tool Steels
N Good in Non-ferrous

RAPIDKUT 2 Flute Solid Carbide Double End Mills

Center Cutting • Stub Length

- 30º Helix
- Used for general purpose milling in most materials of medium hardness such as steel, brass, iron and non-ferrous materials
- Made from premium submicron grain carbide
- Cutting diameter tolerance +.000/.002”

				Uncoated		TiCN		AlTiN

RAPIDKUT® 4 Flute Solid Carbide Single End Mills

Center Cutting

- Used for general purpose milling in most materials of medium hardness such as steel, brass, iron and non-ferrous materials
- Made from premium submicron grain carbide
- 30° Helix

SOLID MORSE MASTER Solid Carbide 4 Flute Single End Mills

30° Helix • Center Cutting

- These 4-flute end mills with a greater core thickness offer increased tool strength and reduced tool deflection
- 4-Flute mills also reduce chip load per tooth for the milling of tougher materials, greater wear resistance and improved surface finish
- Center cutting end allows for plunge cutting into solid material
- **Tolerances:**
  Sizes to 1/4" +.000 - .002"
  9/32 to 1" +.000 - .003"

				Uncoated		TiN		TiCN		TiAlN

truCORE® E14 Solid Carbide 4 Flute Square End Mills

- Square end for general machining and finishing
- Fine grain carbide for greater toughness, wear resistance, and higher transverse rupture strength
- Multiple coatings available for all of your application needs
- Round or Weldon style shank
- 30° Helix

MADE IN THE USA

P Good in Carbon and Tool Steels
K Good in Cast Iron
M Good in Stainless Steels
